

# TMK IR PRESENTATION

June 2018

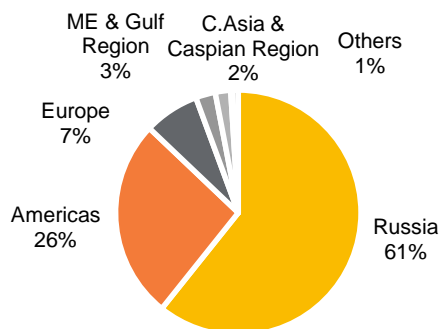

# TMK— Global Supplier of Full Range of Pipes for Oil and Gas Industry

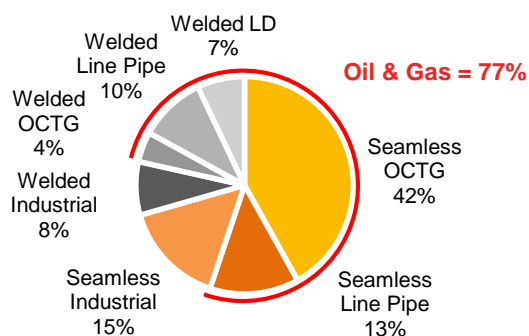

27 production sites in Russia, the USA, Canada, Oman, Romania and Kazakhstan, with trade offices in 10 countries

## TMK sales by region (2017)

## TMK sales by product (2017)

## Key financials

(US\$m/ln)	2014	2015	2016	2017
Revenue	6,009	4,127	3,338	4,394
Adj. EBITDA	829	651	530	605
Adj. EBITDA Margin (%)	14%	16%	16%	14%
FCF <sup>(b)</sup>	252	498	395	77
Net Profit (Loss)	(217)	(368)	166	30
Net Debt	2,969	2,496	2,539	2,688

Source: Company data

Note: Percentages and other figures included in this presentation are subject to rounding adjustments. Totals therefore do not always add up to exact arithmetic sums

(a) Spears & Associates. Excluding China and Central Asia. Onshore and offshore drilling

(b) Calculated as Net cash flows from operating activities plus Net cash flows used in investing activities

# TMK Today – Key Investment Highlights

1

## Industry-leading market position and large modern asset base

- Dominant #1 player in seamless OCTG industry in Russia and Top-3 in the US
- State-of-the-art underutilised production base with major investments completed over 10 years in 2004-14
- Established longstanding relationships with major oil & gas upstream and midstream players

2

## Combined exposure to some of the most attractive and dynamic regional oil & gas markets

- Russia – large low-cost oil producing region; a major market with increased drilling activity in 2017
- TMK - dominant player in Russian oil & gas with 38%<sup>(a)</sup> market share for pipes used in the oil and gas industry, 64%<sup>(a)</sup> market share in seamless OCTG
- US OCTG market is at the recovery stage, following a c.75% demand contraction in 2014-2016 – with shale industry supported by OPEC agreement and conducive political environment under new administration
- TMK – Top-3 US OCTG producer with its market share at 10% in 2017

3

## Low-cost position and stability of margins underpinned by significant vertical integration

- High degree of vertical integration in the seamless business due to in-house steel production
- Ability to pass through costs of steel products – demonstrated by stable margins throughout the cycle
- Substantial improvement in the global competitive positioning on the back of Ruble devaluation in 2014-16

4

## Cost-cutting discipline and consistent focus on de-leveraging

- Cost-cutting programs with Adjusted EBITDA<sup>(b)</sup> effect of US\$100m+ in the each of the past 3 years; disciplined capex
- Continuous reduction in net debt (US\$1bn+ reduction in net debt since 2013)

5

## Superior governance practices and uniquely stable and experienced management team

- Core management team unchanged since IPO in 2006
- 5 Independent Directors on the Board with vast diversified international and domestic experience

Note: (a) Adjusted EBITDA for TMK represents profit/(loss) for the period excluding finance costs and finance income, income tax (benefit)/expense, depreciation and amortisation, foreign exchange (gain)/loss, impairment/ (reversal of impairment) of non-current assets, movements in allowances and provisions (except for provisions for bonuses), (gain)/loss on disposal of property, plant and equipment, (gain)/loss on changes in fair value of financial instruments, share of (profit)/loss of associates and other non-cash, non-recurring and unusual items

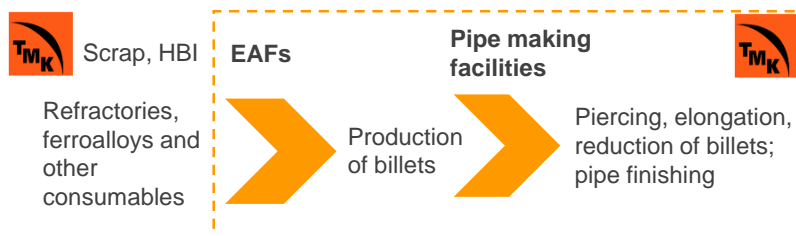

(b) Calculated as (Adjusted EBITDA – Capex) / Adjusted EBITDA

# Vertically Integrated Model Ensuring Margin Stability

- Operating in one of the lowest cost regions for steel production globally
- Fully vertically integrated seamless pipe production (upstream and downstream) across all regional divisions
- Ability to pass through increases in the cost of steel products to end-customers
- Resilient margin throughout the cycle of high and low steel prices
- In 2016, an agreement with Metalloinvest for supply of hot-briquetted iron ("HBI") was signed

## Seamless pipe – simplified value chain

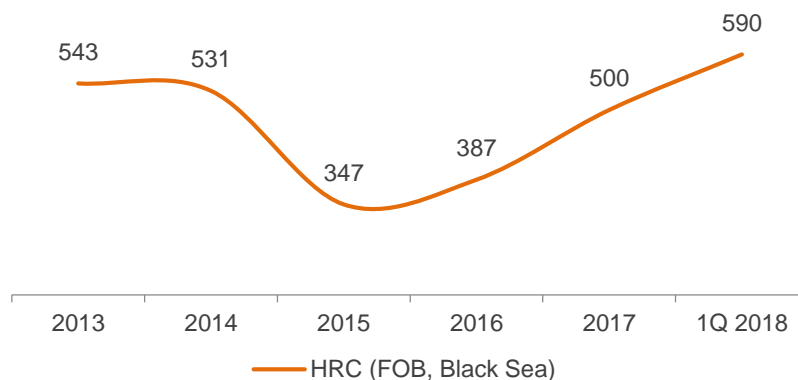

## Welded pipe – simplified value chain

Perimeter of TMK operations in the value chain

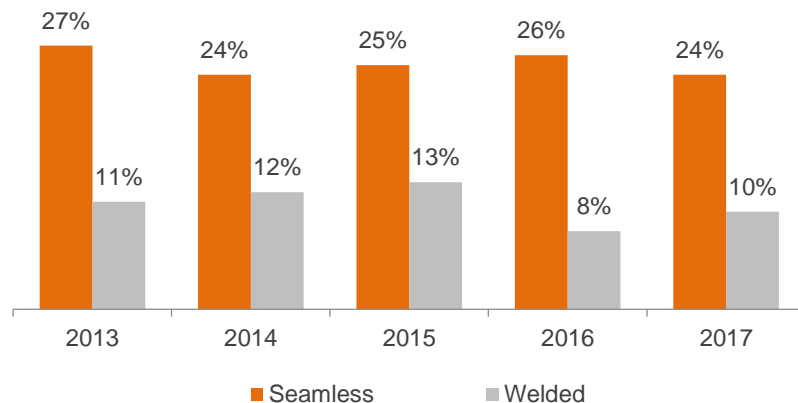

## Steel products price volatility

(US\$/t)

Source: Metal Expert

## TMK gross margin by product segments

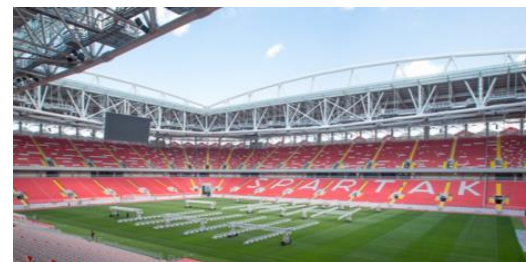

# Strong Position in Multiple End-Markets for Pipes Beyond Oil & Gas

## Automotive

- TMK-ARTROM is qualified as an authorised supplier for such companies as Dacia (a subsidiary of Renault)
  - No. 1 supplier for Dacia in 2015
- Qualified as Tier 2 supplier for Toyota

## Civil Construction

- Galvanised pipe for the outer steel frame of the Otkritie Arena stadium in Moscow
- Impact resistant seamless pipe shipped for the construction of Zenit Arena stadium retractable roof in St Petersburg
- Structural steel pipe for the stadium roof in Samara

## Energy and Chemicals

- In 2015, TMK won a number of tenders for pipe shipments to energy and petrochemical businesses, including boiler long-length pipe for Taman TPP's equipment

## Diversified Hi-Tech Solutions

- TMK-INOX stainless pipe of 8–114 mm diameter, used in nuclear, aircraft, automotive, aerospace and energy industries

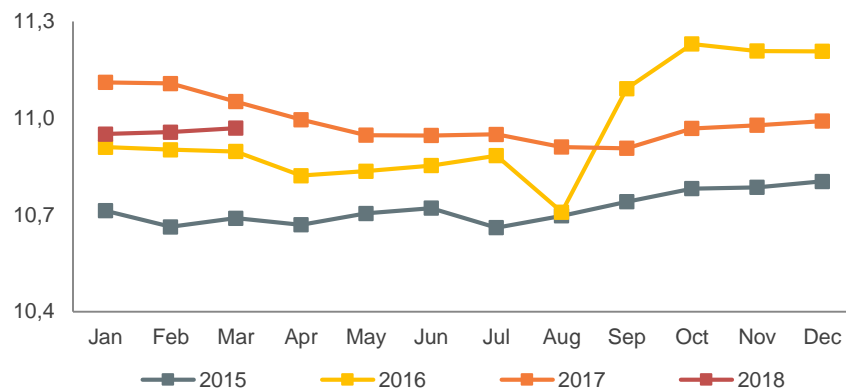

# **TMK Russian Division: Market Overview**

# Oil Production in Russia Remains Strong...

**Oil production remains well above 10.5 MMbpd whilst adhering to the agreement with OPEC ...**

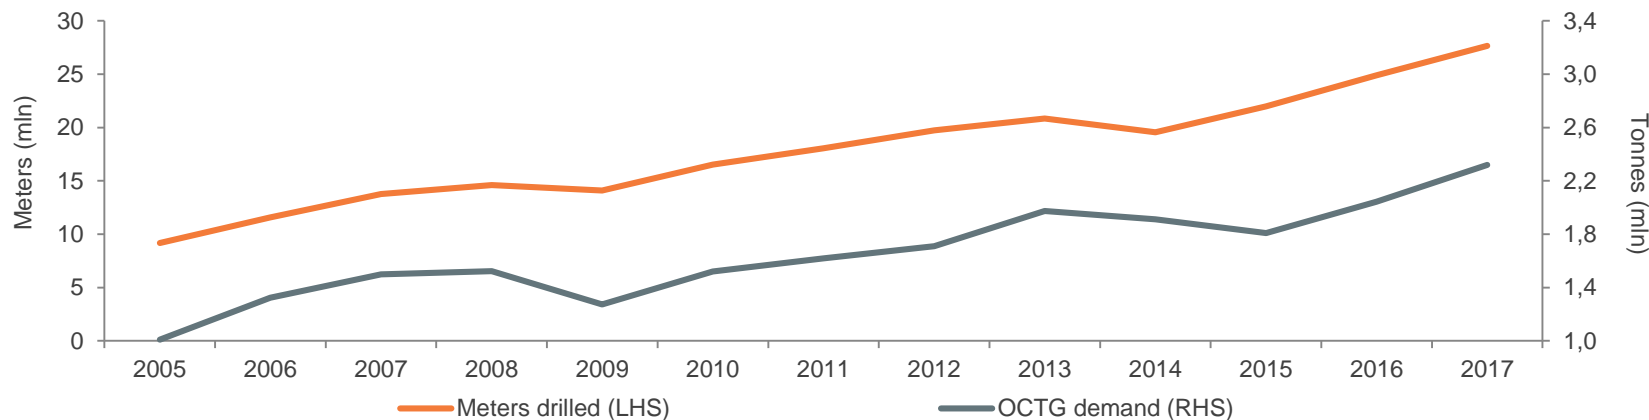

Russian total oil output, MMbpd

- Russian oil production set new historic record in November 2016, reaching 11.2 mmbpd
- As part of its deal with OPEC, which was prolonged until the end of 2018, Russia has agreed to cut production by 300,000 bpd compared to October 2016 level
- Production cuts are unlikely to be reached through decrease in drilling activity given deteriorating well flow dynamics across Russia

Source: Interfax, Info TEK

**...However OCTG demand is growing supported by existing level of production and development of greenfields**

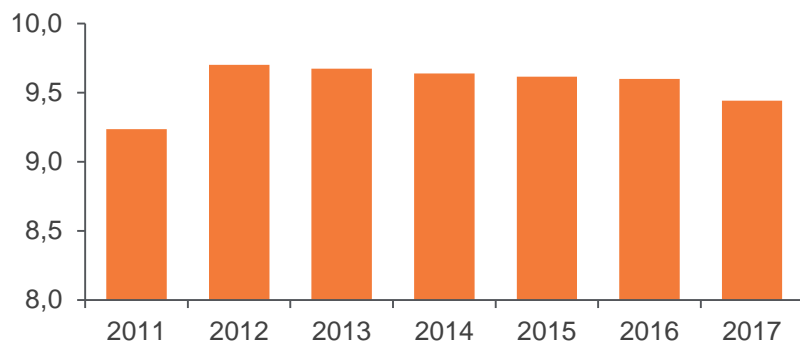

Source: Interfax, Info TEK, Spears & Associates, TMK estimates

## ... However There are Changes to its Composition ...

Sidetracking progress (# of operations)

Source: RPI 2017

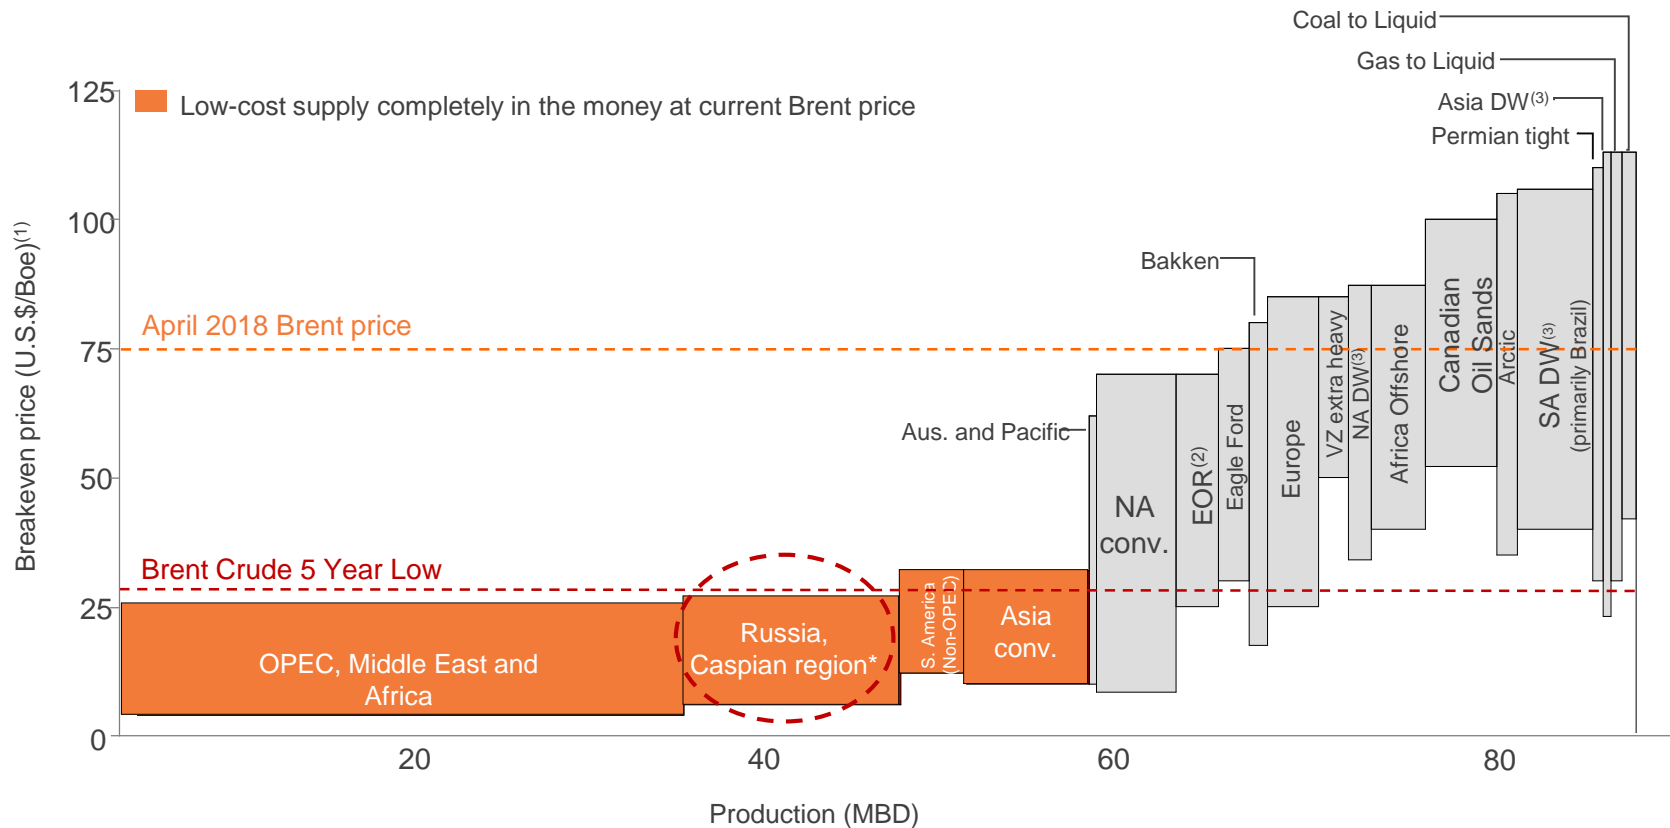

# Attractive Portfolio of Premium OCTG Projects

# TMK's Home Market is One of the Lowest Cost Oil Producing Regions

## Global oil production supply curve

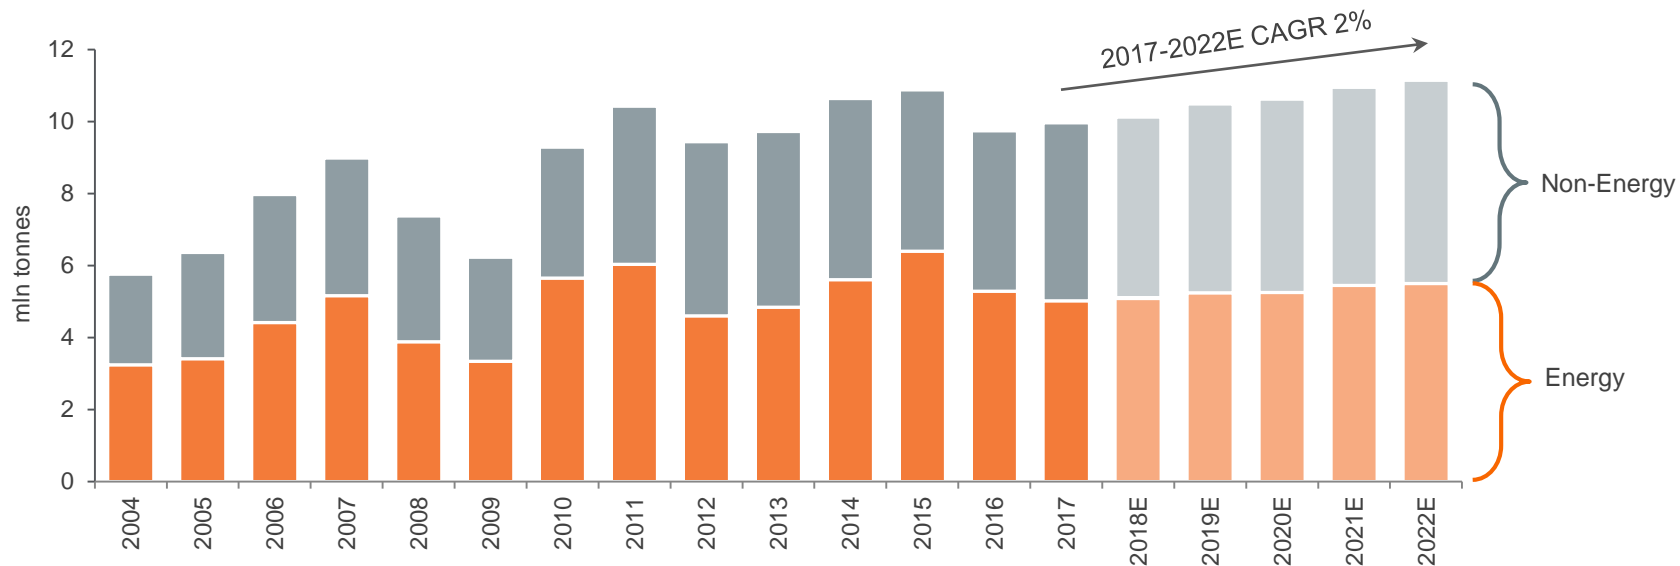

Even with oil at 5 year lows, the low cost Russian and Caspian region is able to remain profitable unlike the majority of its international counterparts. In 2015 and 2016, Russia was the only region globally to maintain healthy drilling activity and stable OCTG demand.

Notes: (1) Breakeven price assumes a 10% return, and NPV of zero; \*includes Azerbaijan, Kazakhstan, Turkmenistan and Uzbekistan; (2) Enhanced oil recovery; (3) Deep Water

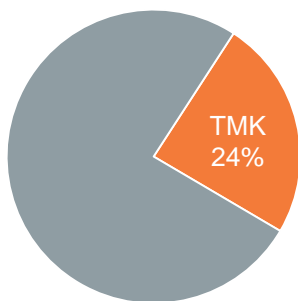

# Russian Tube and Pipe Market

## No.1 on the Russian tube and pipe market

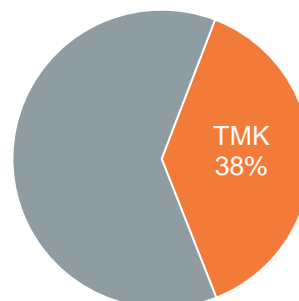

2017

Source: TMK estimates, based on FY2017 numbers

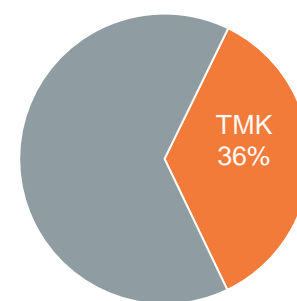

## 36% market share of energy pipe demand

2016

Source: TMK estimates, based on FY 2016–2017 numbers

2017

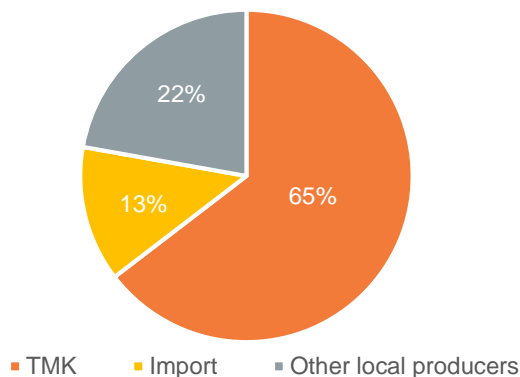

# Strong Position on the Domestic Market

## TMK share of seamless OCTG remains high

Seamless OCTG Market Share, %

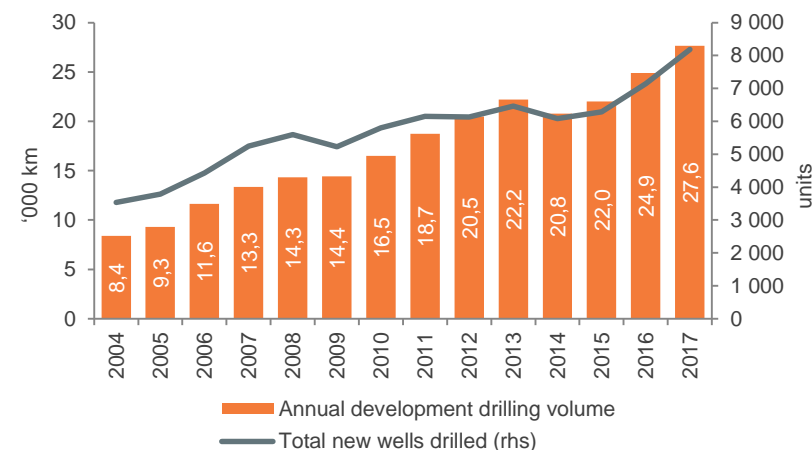

Source: TMK estimates based on 1Q 2018 numbers

- Development of conventional and unconventional reserves will require the use of non-conventional drilling techniques and reliable OCTG products
- Russian seamless OCTG market was up 10% YoY in 2017
- TMK is a leader in the production of seamless OCTG on the Russian market with around 65% market share for 1Q 2018

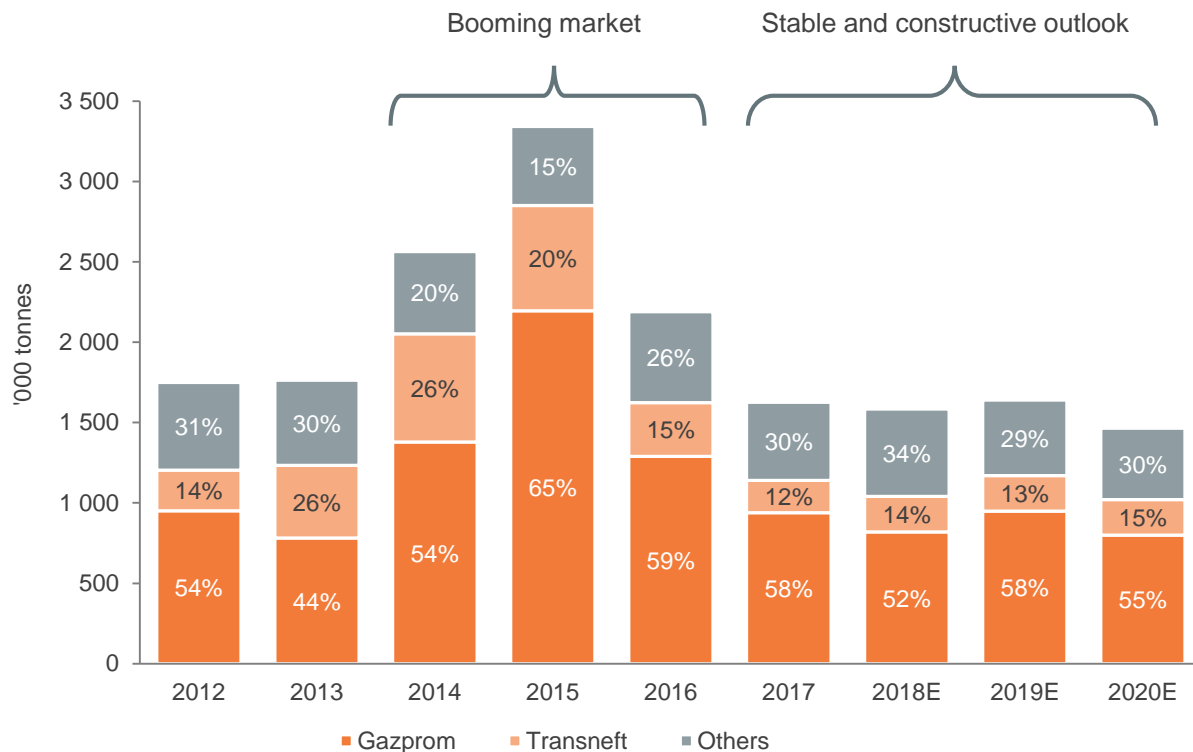

## Growing oil drilling market in Russia

Source: CDU TEK, TMK estimates

# LDP Demand in Russia

## LDP demand in Russia, 2012–2020E

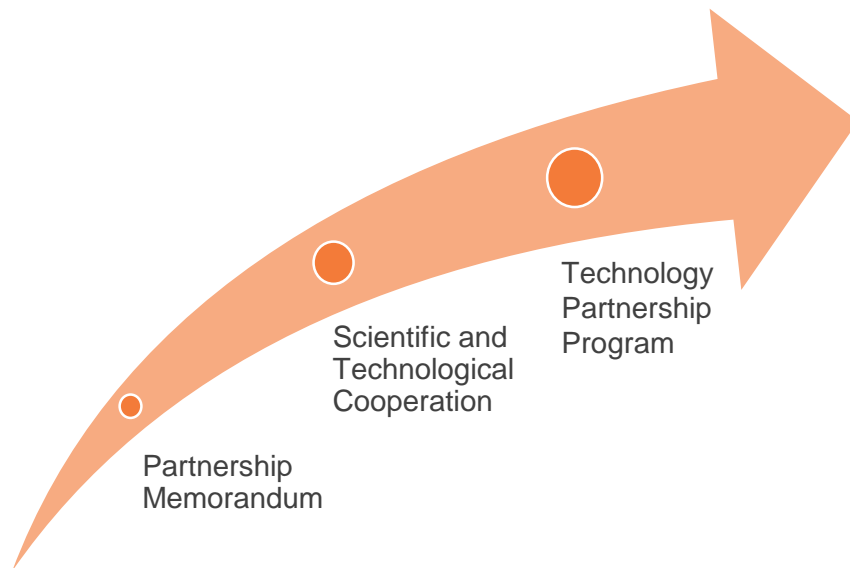

Source: TMK estimates

- Major projects planned: Power of Siberia (GAZP), NS2 Onshore (GAZP), Power of Siberia-2 (GAZP), Sakhalin – Khabarovsk – Vladivostok GTS (GAZP), maintenance needs of Transneft and Gazprom

# Strategic Cooperation Supporting Growth

## Strategic cooperation with key customers

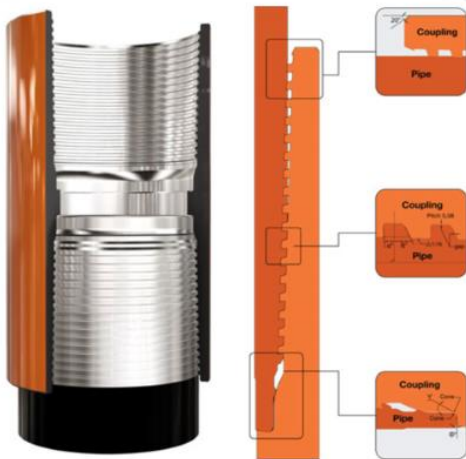

- Newly signed long-term agreements with key customers to develop and supply innovative premium products with related services will strengthen TMK's position
- Import substitution programs guarantee purchase of tubular products and related services
- TMK's innovative products are able to considerably improve the energy efficiency of wells, as well as safety and environmental impact

# TMK UP Connections for all Conditions

**TMK UP Centum** — is the latest generation of gas-tight premium threaded connections for casing pipe featuring innovative design. It is the most recent offer within the line of TMK UP premium connections. The connection strength equals the pipe strength, considerably increasing the reliability of a pipe string during construction of wells with complex configurations

The first batch was produced for NOVATEK's  
**Arctic LNG-2 project**  
developed at Salmanovskoye  
oil and gas condensate field

**TMK UP Centum** is certified to ISO 13679 CAL IV, the highest international industry standard for premium threaded connections, and demonstrates 100% tension and compression efficiency

**Product Range:** 2–3/8"–13–5/8" / 60,32 –346,08 mm

## Distinctive Features

- Sealability envelope equal to 100% of pipe body strength
- Fastest assembling premium connection

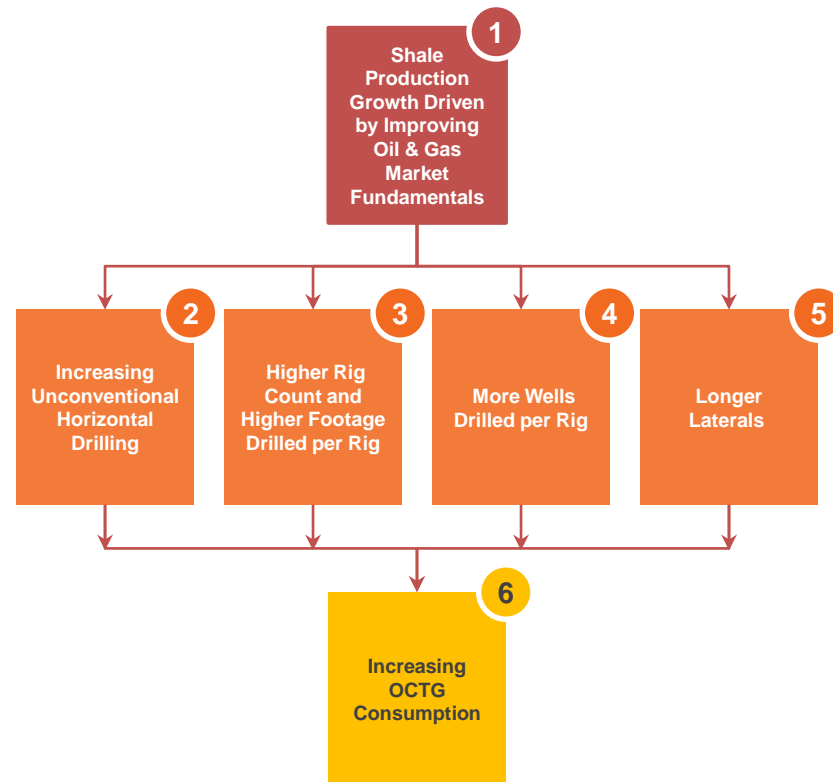

## **TMK American Division: Market Overview**

# Strong Fundamentals Driving OCTG Consumption

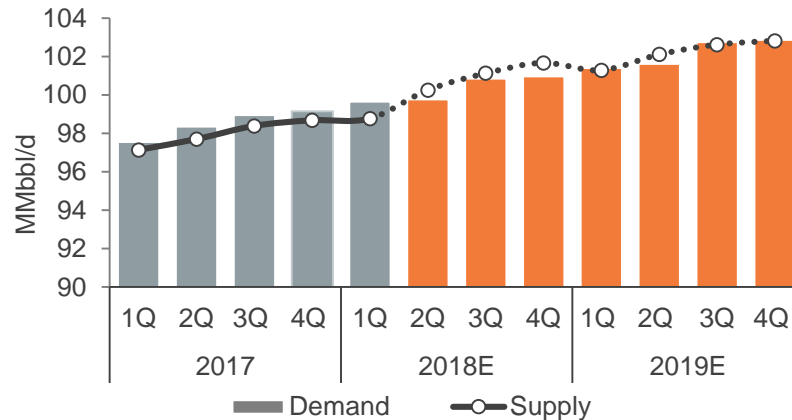

- Shale oil production is growing supported by the O&G market recovery, which is reflected in higher unconventional exploration activity
- New levels of shale oil production are achieved by:
  - Increased unconventional horizontal drilling
  - Higher rig count and higher footage drilled per rig
  - More wells drilled per rig
  - Longer laterals
- As a result, OCTG consumption is increasing, driven by growing needs across the energy value chain

## Strong fundamentals support OCTG demand

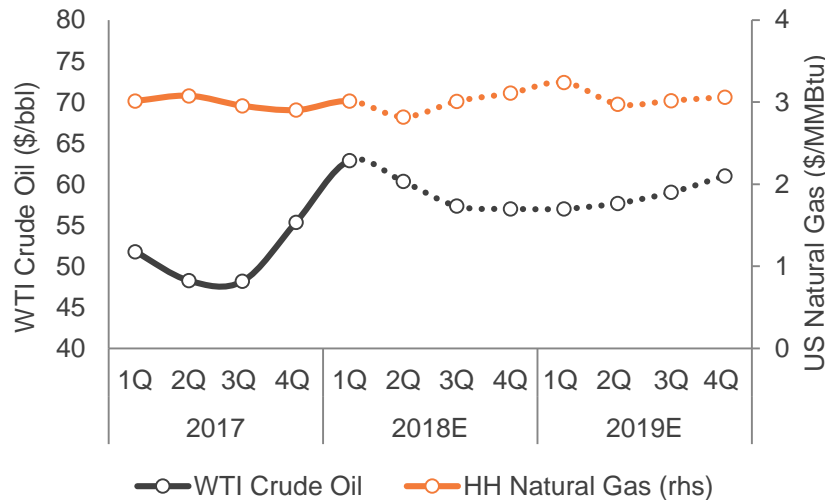

# 1 Improving Oil & Gas Market Fundamentals ...

## Signs that the global glut is easing...

Source: EIA

## ...improve sentiment and price in early 2018

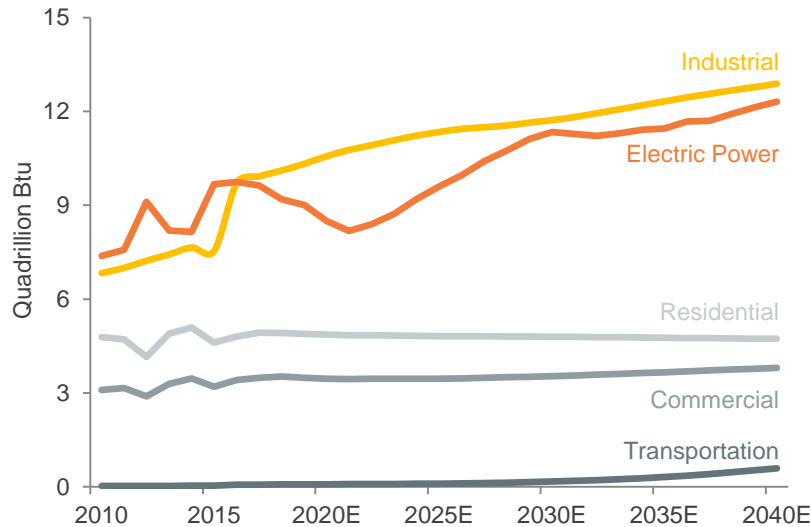

Source: EIA

- Sentiment has improved as the EIA's forecast for 2018E is positive
- These new estimates signal confidence that the global oil glut is finally easing
- Improved demand outlook, weaker oil and gas investment, and the OPEC prolonging production cuts indicate a tighter market in 2018E
- Growth in exports and consumption will contribute to natural gas output rising and stabilising at \$3.07-3.15/MMBtu in 2Q-4Q 2018

# 1 Improving Oil & Gas Market Fundamentals ... (cont'd)

**U.S. natural gas consumption by sector, 2014 – 2040E**

Source: EIA

**Growth in exports and consumption point to higher Henry Hub natural gas prices in 2018**

Source: EIA

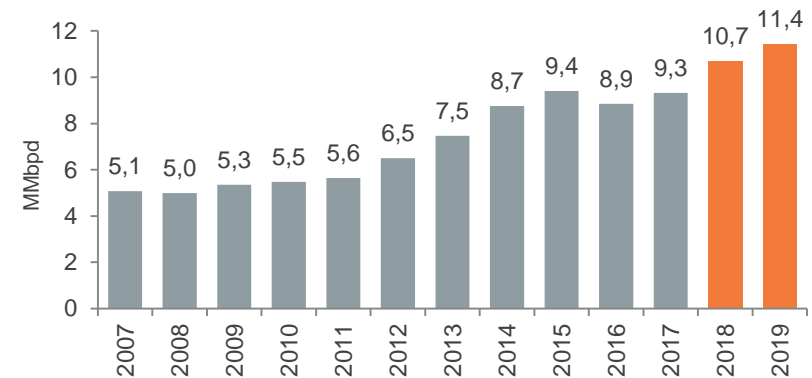

- Industrial and electric power sectors will drive demand for natural gas over the next 20 years
- In early 2000, 16% of electricity was generated by natural gas and 52% by coal, while in 2017 it is expected that 31% of electricity will be generated by natural gas and 31% by coal
- Natural gas storage is projected to end the 2017E injection season at below average levels, creating a tighter supply/demand balance moving into 2018E and upward pressure on natural gas prices

# 1 ... Drive U.S. Shale Production ...

- According to EIA forecasts, U.S. crude oil production is set to achieve 10.7 MMbpd and 11.4 MMbpd levels in 2018E and 2019E respectively vs. 9.3 MMbpd in 2017, driven by a corresponding recovery of shale oil production
- Shale oil production has proven resilient despite the lower oil price environment, maximizing output potential at lower profitability levels
- U.S. shale oil production reached the pre-crisis level of approximately 6 MMbpd in September 2017 and increased further to 6.9 MMbpd in April 2018

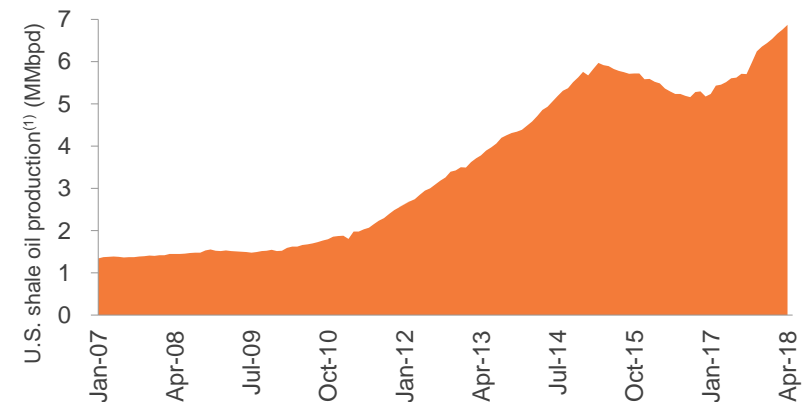

Notes: (1) Includes total oil production from Anadarko, Appalachia, Bakken, Eagle Ford, Haynesville, Marcellus, Niobrara, Permian & Utica

## U.S. crude oil production

Source: EIA

## U.S. shale oil production<sup>(1)</sup> is growing

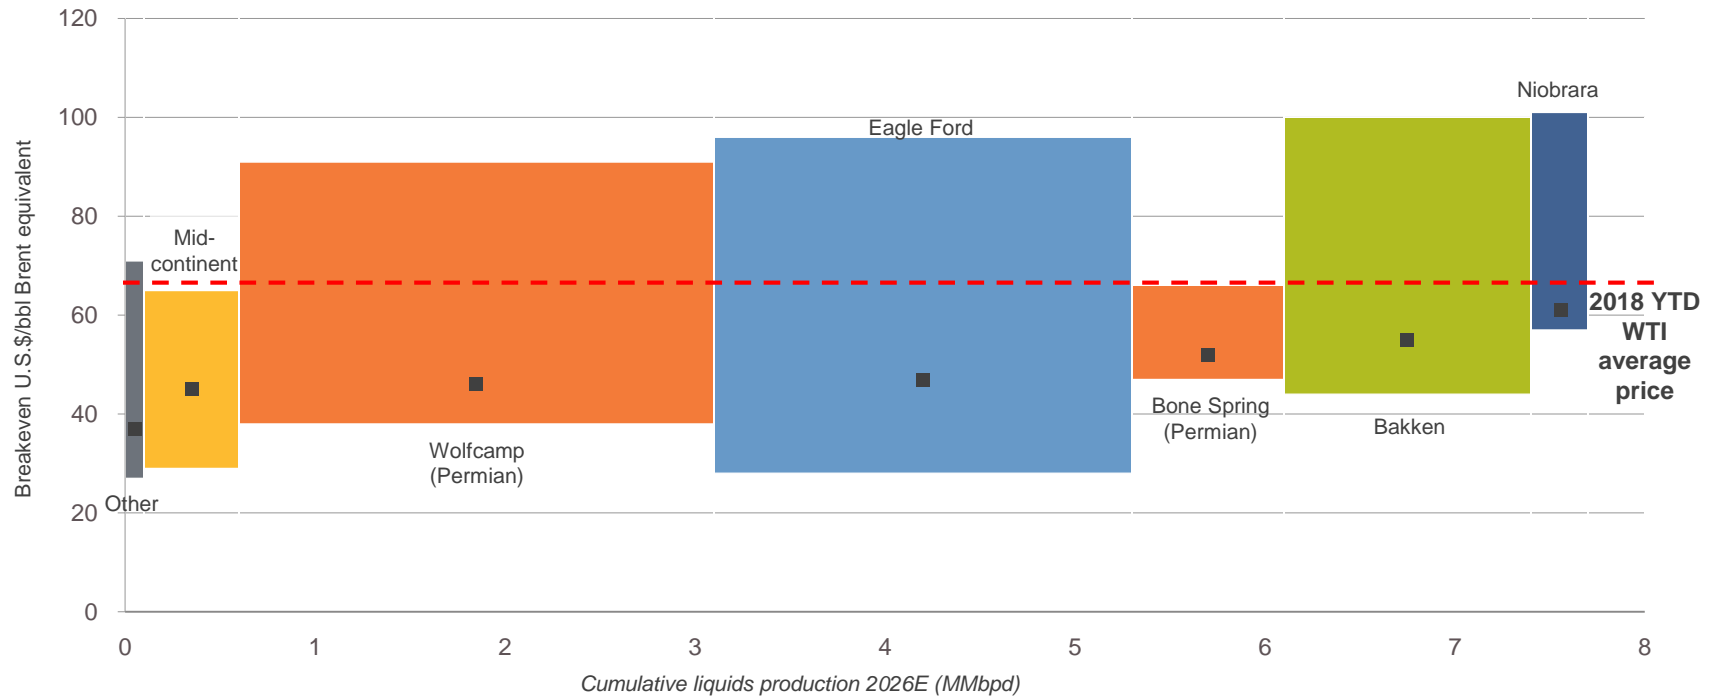

Source: EIA

# 1 ... Which is Sustainable in the Long Term at Current Oil Price Levels

## Continental U.S. tight oil cost curve 2026E

■ Weighted average breakeven price based on 2026E production

Source: Wood Mackenzie

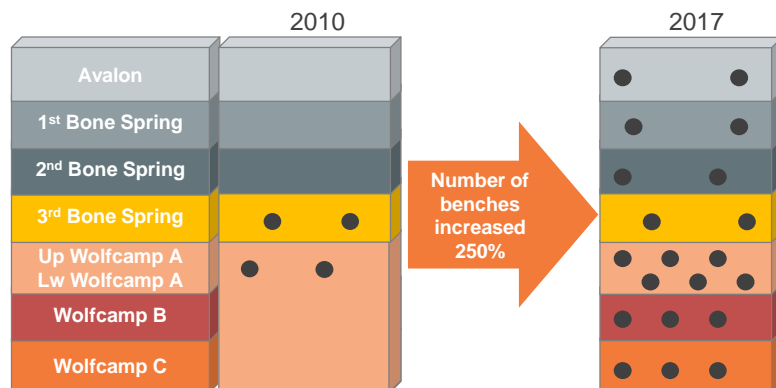

- During the past 2 years, U.S. shale players have managed to decrease production costs
  - Drilling technology has evolved, driven by efficiency requirements
  - Key changes included higher intensity of drilling, longer laterals, significantly higher usage of proppants and equipment and well string standardization
- Despite a wide variation between plays, many U.S. shale producers are profitable at oil prices in the U.S.\$50-60/bbl range in the long term
  - A number of shale plays, incl. Permian and Eagle Ford basins as well as Mid-continent region of the U.S., are profitable at around U.S.\$45-50/bbl

## 2 Driving Increasing Unconventional Horizontal Drilling ...

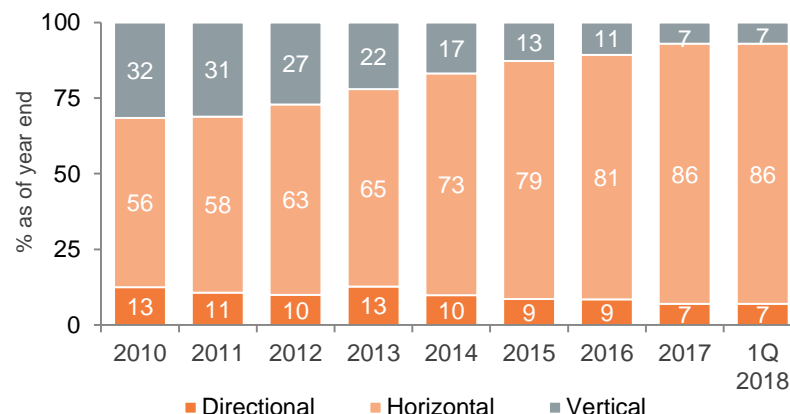

- Horizontal and directional drilling exceeded 90% in 2017 and has more than doubled for the last 10 years
- According to Spears & Associates estimates, U.S. drilling and completion spending doubled YoY in 2017 and will increase by 25% YoY in 2018E
- Growing number of available productive benches means that for any drilled well there is the potential for additional drilling activity further down the line

### Potential for additional drilling activity: Permian basin (Delaware sub-basin) example

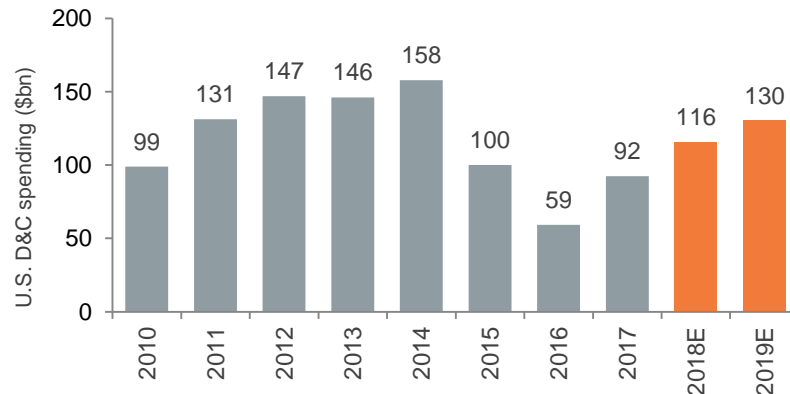

Source: Spears & Associates, Drilling Production Report as of June 2017

### U.S. active rig count by type of drilling

Source: Baker Hughes

### U.S. drilling and completion spending

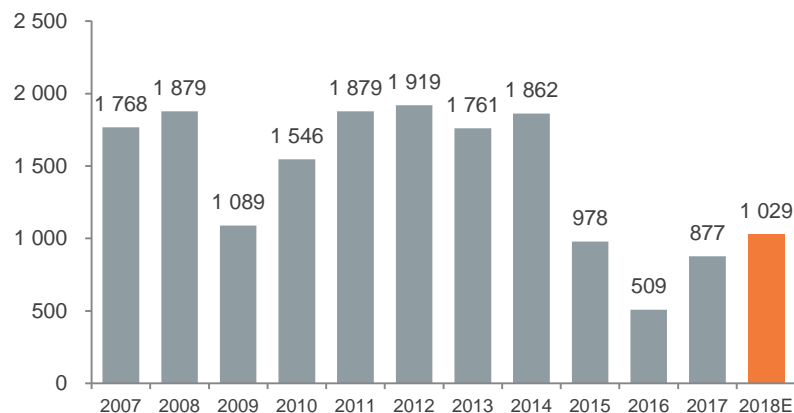

Source: Spears & Associates

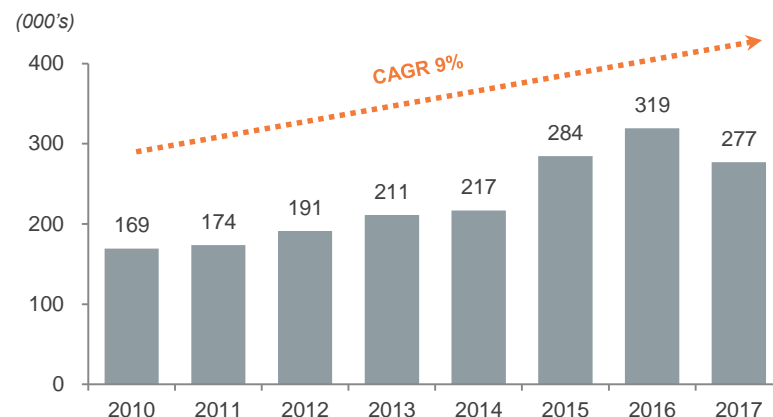

## 3 ...Growing Rig Count and Footage Drilled per Rig ...

U.S. average annual rig count<sup>(1)</sup>

Source: Baker Hughes, BTU Analytics, Raymond James, Spears & Associates, Inc.

Footage drilled per rig

Source: Spears & Associates, Inc.

- Rig count increased by more than 70% YoY in 2017 and is expected to grow by 17% YoY in 2018E
- After a slowdown in 4Q 2017 caused by exhaustion of E&P budgets, the consensus forecast indicates that the rig count will average in the low-1,000s during 2018E
- Number of rigs used for horizontal drilling increased in 2017, according to Baker Hughes
- According to Spears & Associates, over the past 8 years footage drilled per rig grew at a CAGR of 9%

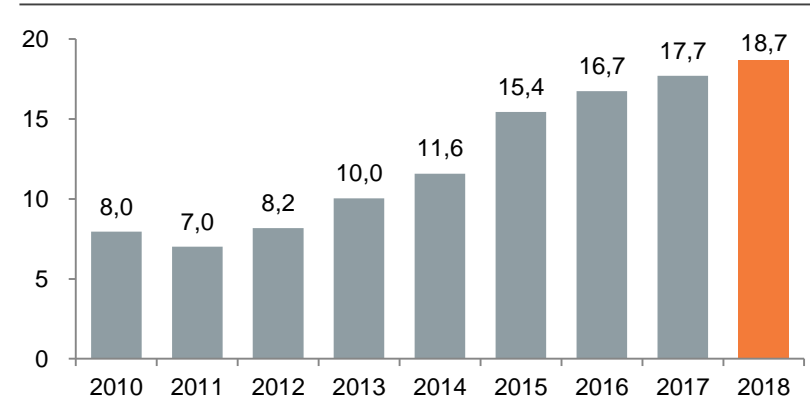

Notes: (1) Numbers for 2007 – 2017 based on Baker Hughes data, numbers for 2018E based on median between BTU Analytics, Raymond James, and Spears & Associates estimates

## 4 5 ... Coupled with More Wells Drilled per Rig and Longer Laterals ...

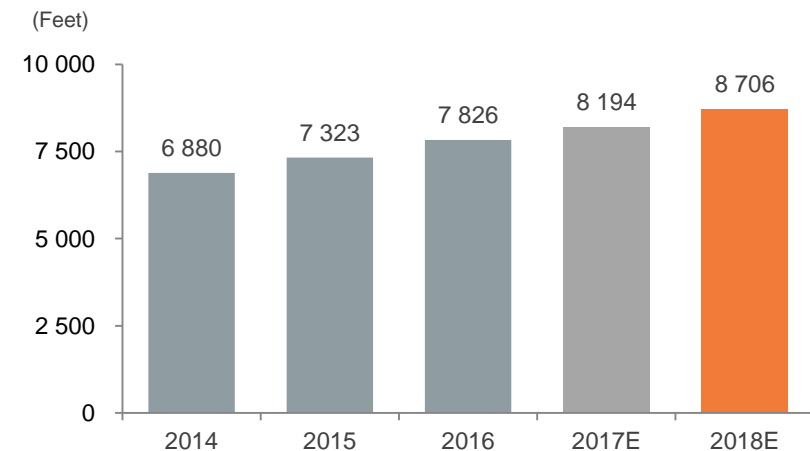

- Pad drilling operations allow operators to drill more horizontal wells per rig per year
  - In the U.S., the average number of horizontal wells drilled per rig has increased from an average of 8.0 wells per rig in 2010 to an average of 17.7 wells per rig in 2017
  - Increased lateral lengths and greater drilling complexity are driving greater spending on technologically advanced drilling consumables, such as OCTG with premium and semi-premium connections
- According to Spears & Associates, in 2014, 5,000 foot laterals represented 50% of new wells drilled. However, almost 71% of new wells drilled in 4Q 2017 had lateral lengths of over 6,000 feet. The number of lateral wells in excess of 8,000 feet drilled in the United States increased 73% during 2017.

**Horizontal wells drilled per rig**

Source: Baker Hughes Rig Count, Spears

**Average U.S. lateral length**

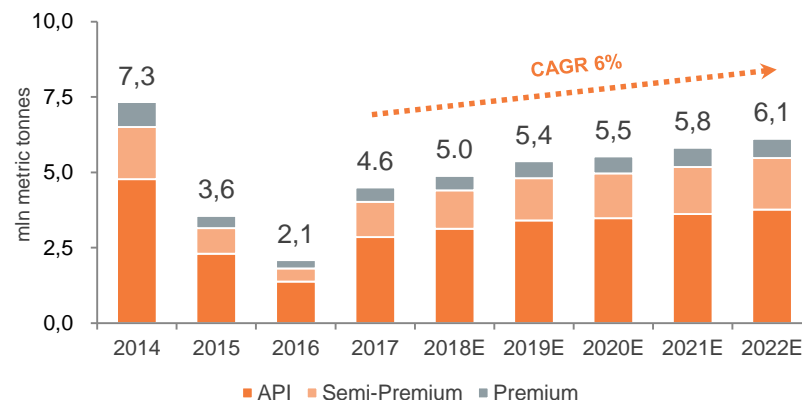

Source: Spears & Associates, Inc.

## 6 ... Resulting in OCTG Consumption Growth ...

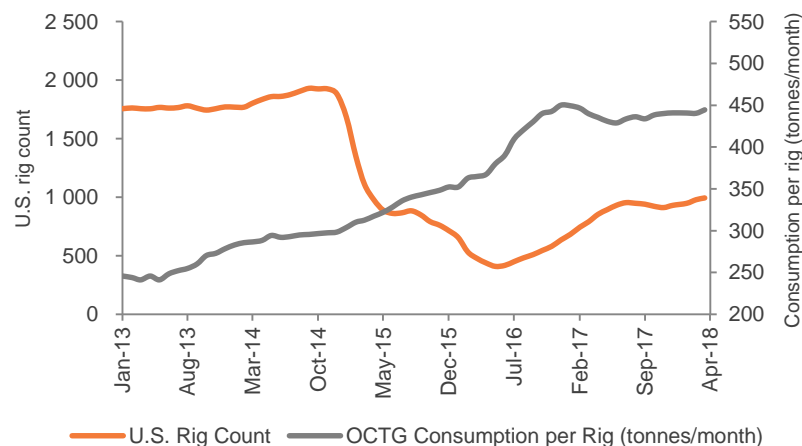

- U.S. consumption of OCTG reached 4.6 mln metric tonnes in 2017, more than twice 2016
- Total demand for OCTG in the U.S. is projected to grow at a CAGR of 6% YoY in 2017 – 2022E
- OCTG consumption per rig has nearly doubled since January 2013, allowing for significant recovery in the sector despite having fewer than half of the rigs in operation
- Seamless pipe has increased its share of total U.S. pipe volume as the result of increased horizontal and directional drilling as well as longer laterals
- Based on the OCTG Situation Report, seamless pipe represented c.30% of total U.S. OCTG shipments in 2017

**Total U.S. OCTG consumption**

Source: Company estimates

**OCTG consumption per rig**

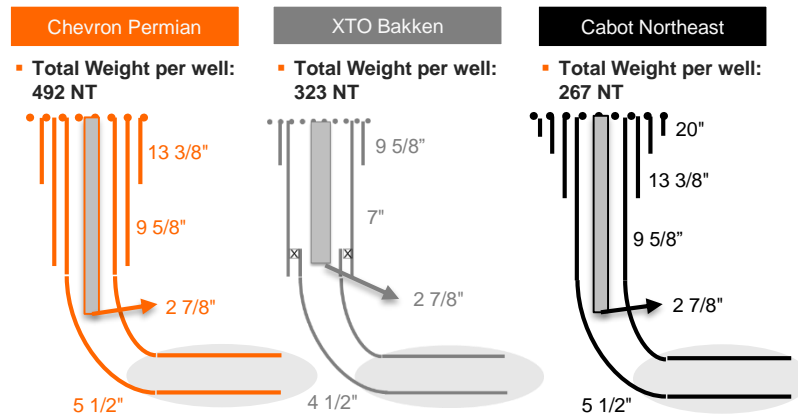

Source: Preston Pipe, Baker Hughes

## 6 ... Inventory Normalization, Higher Efficiency ...

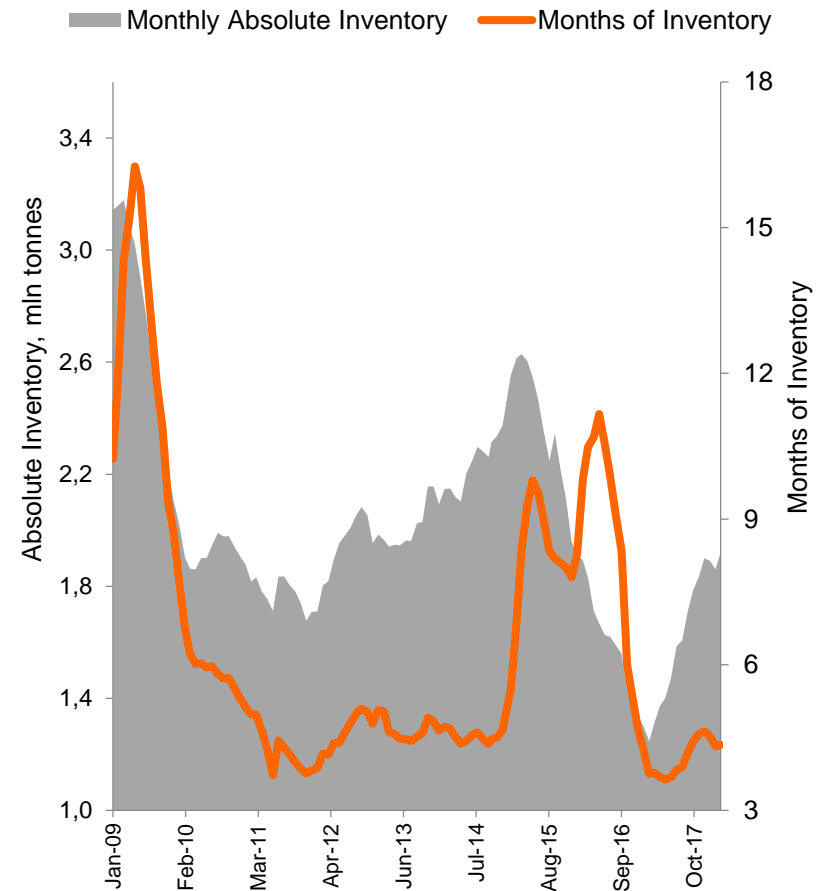

- US OCTG inventories have reached the normalized levels of 2014 as shipments outpace consumption
- Despite months of inventory having reached 2014 levels, the monthly absolute inventory is meaningfully below pre-crisis levels due to higher industry efficiency:
  - Design has standardized resulting in more obsolete inventory
  - E&P investment has spilled over into the management of inventory: the amount of pipe on the ground that was typically required to maintain a certain rig level has decreased from previous cycles

### Standardized diameters of OCTG piping

Source: Company data

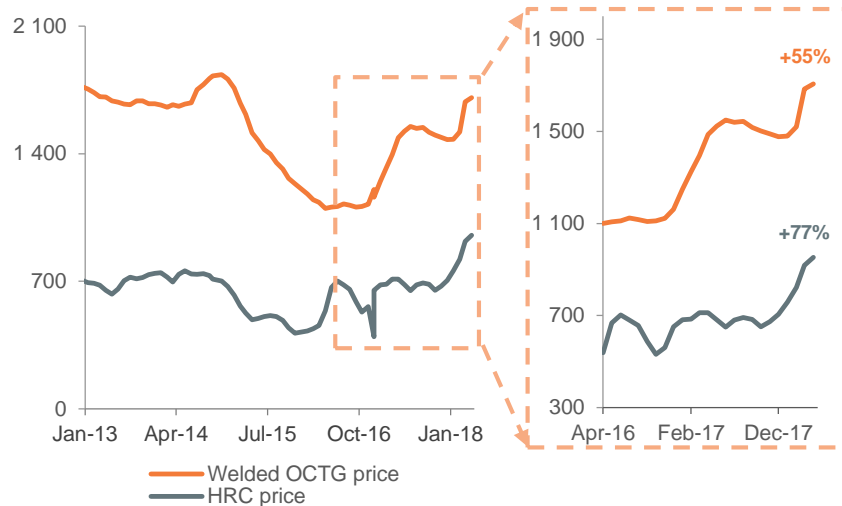

### Increased shipment levels bring months-of-inventory back to pre-downturn levels

Source: Preston Pipe & Tube Report

### U.S. distributor welded OCTG vs. HRC prices

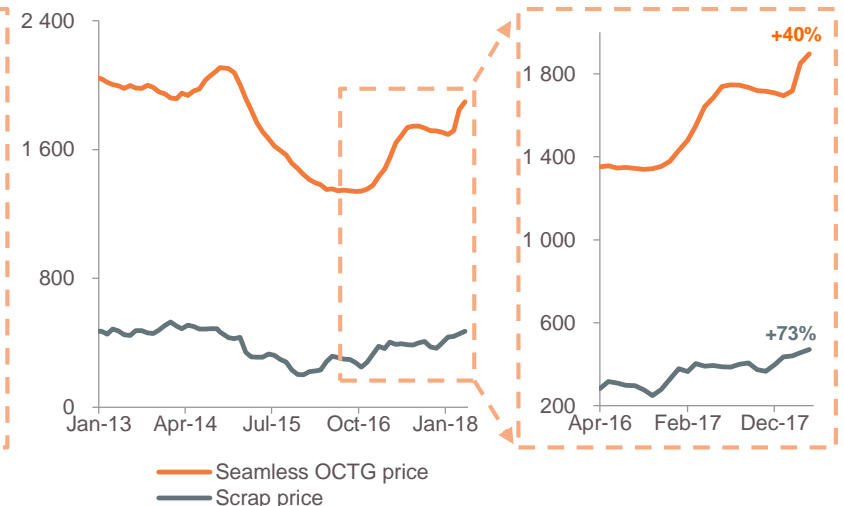

(U.S.\$/tonne, monthly average)

Source: Pipe Logix, AMM

### U.S. distributor seamless OCTG vs. scrap prices

(U.S.\$/tonne, monthly average)

Source: Pipe Logix, AMM

- Prices have rallied from the low in April 2016. Since the trough, welded OCTG prices increased by more than 55% and seamless OCTG prices – by 40%
- Prices increased in February-April 2018 as a result of the growing pipe demand and supply concerns over Section 232 actions

## Strategic Overview

# Key Strategic Pillars

## Enhance leadership in key segments and enter new product niches

- Dominate the Russian OCTG and line pipe markets
- Remain in the TOP 3 leading OCTG producers in the USA
- Increase the share of high-tech products in the Russian division's revenue to 50% by 2022 and maintain a leading position in the Russian market for premium connections

## Optimise vertical integration

- Increase capacity utilization of steelmaking facilities through higher production volumes of steel billets and other products, and maximize the financial impact
- Expand presence in further processing of tubular products (drill pipe, coating)
- Develop a service offering of ready-to use comprehensive engineering solutions for customers

## Enhance the sales platform and leverage TMK's global scale

- Expand commercial footprint of TMK's products and services
- Develop strategic partnerships with major customers and global consumers
- Focus on offering products that have a global market and stable demand outlook, i.e. high-tech seamless pipes and premium connections

## Focus on innovation and digitalisation

- Develop e-commerce across all divisions via TMKe Trade, the first tubular goods Internet shop in Russia
- Use cutting-edge digital technology to improve product quality and cut costs

## Enhance operational excellence

- Foster a culture of continuous operational improvements and production cost cutting
- Ensure consistent product quality through increasing the sustainability of technologies and personnel qualification

## Strengthen financial performance and investment appeal

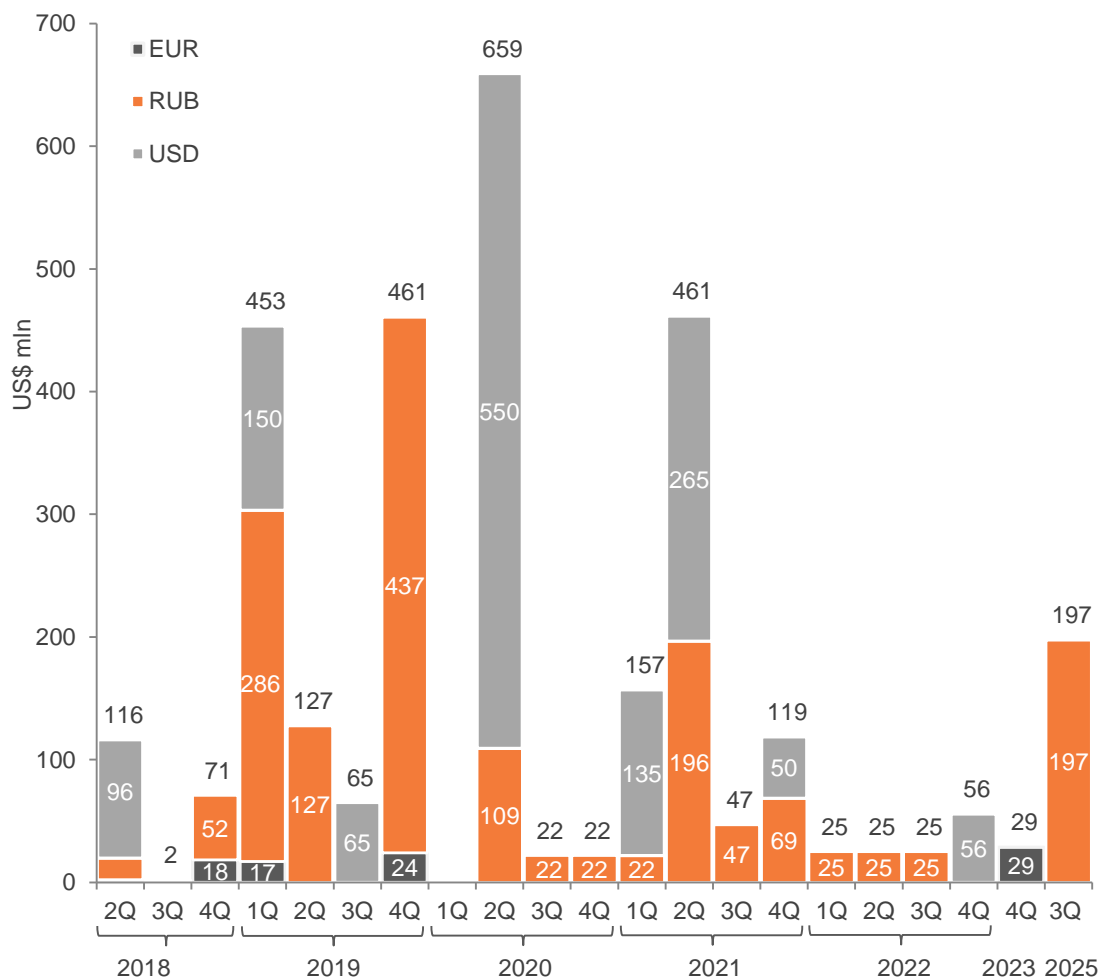

- Maximize operating cash flow
- Monetize international assets, strategic alliances and joint ventures in all regions of presence
- Reduce leverage to 3.0x Net Debt<sup>(a)</sup>/ EBITDA<sup>(b)</sup> as of FY2019
- Reduce leverage to 2.5x Net Debt<sup>(a)</sup>/ EBITDA<sup>(b)</sup> as of FY2021

Note: (a) Net Debt represents interest bearing loans and borrowings plus liability under finance lease less cash and cash equivalents and short-term financial investments

(b) Adjusted EBITDA represents profit/(loss) for the period excluding finance costs and finance income, income tax (benefit)/expense, depreciation and amortisation, foreign exchange (gain)/loss, impairment/ (reversal of impairment) of non-current assets, movements in allowances and provisions (except for provisions for bonuses), (gain)/loss on disposal of property, plant and equipment, (gain)/loss on changes in fair value of financial instruments, share of (profit)/loss of associates and other non-cash, non-recurring and unusual items

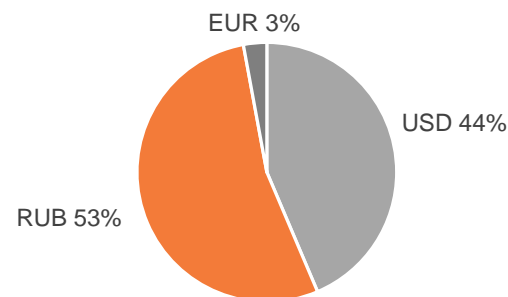

# Comfortable Maturity Profile as at March 31, 2018

- As of March 31, 2018, Net Debt amounted to US\$2,710 mln
- In April 2017, TMK placed a RUB 5 billion 10-year bond with a 9.75% coupon rate
- In June 2017, TMK placed a RUB 10 billion 10-year bond with a 9.35% coupon rate
- In January 2018, TMK fully redeemed the remaining part of its US\$500 mln 7-year Eurobond issue in the total nominal value of US\$231 mln
- The weighted average nominal interest rate decreased by 25 bps since the end of 2017 to 7.92%
- Credit Ratings:
  - ✓ S&P B+, Stable
  - ✓ Moody's B1, Stable

## Debt currency structure

Note: Certain monetary amounts, percentages and other figures included in this presentation are subject to rounding adjustments. Totals therefore do not always add up to exact arithmetic sums.

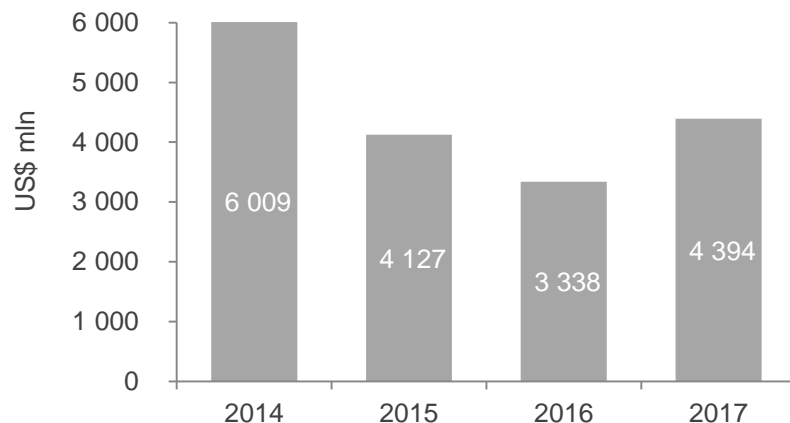

## Summary Financial Results

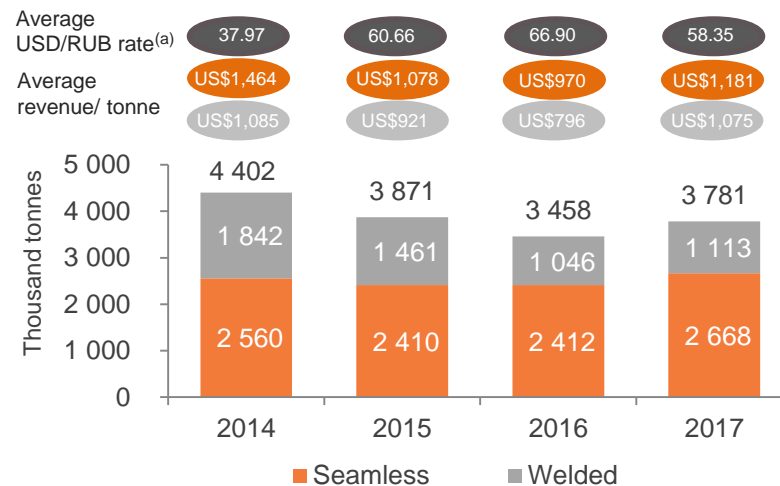

# FY Consolidated Results Snapshot

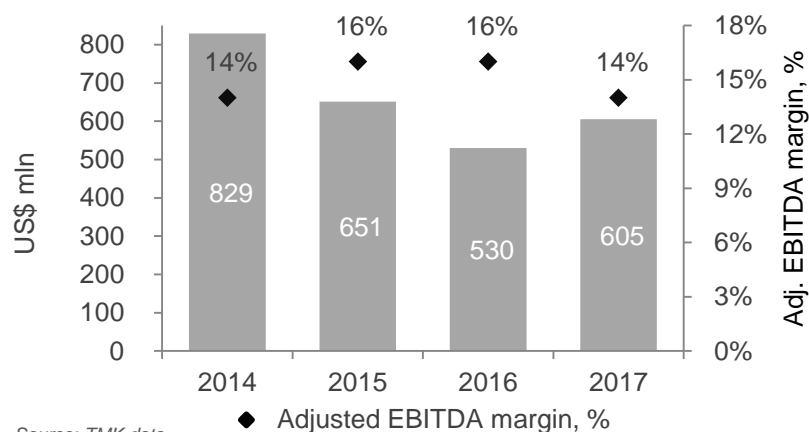

## Revenue

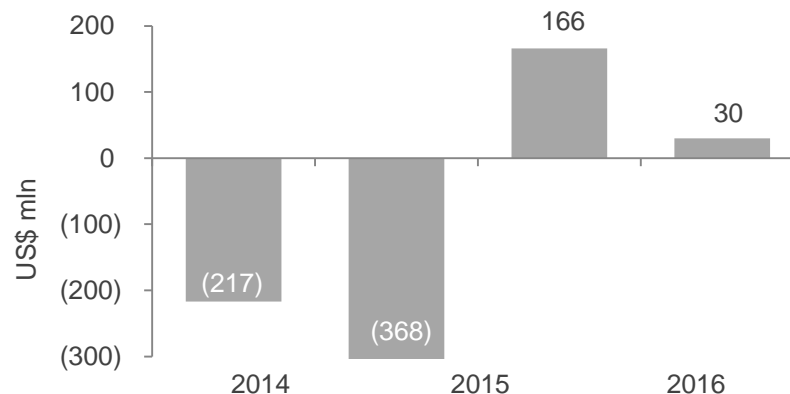

## Volumes and realised prices

## Adjusted EBITDA<sup>(b)</sup>

## Net profit

Source: TMK data

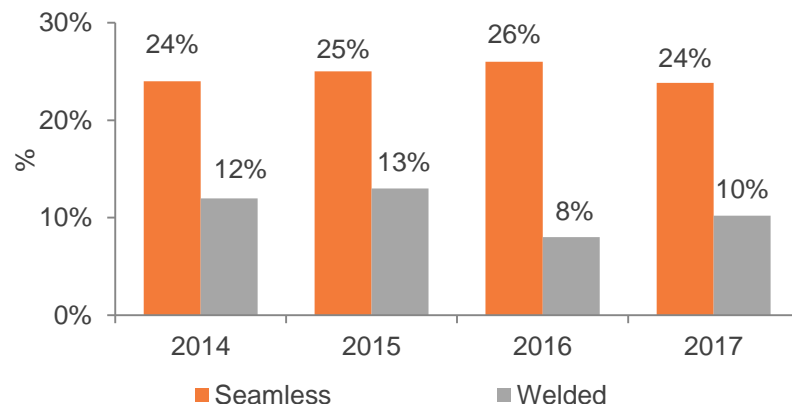

Note: (a) Average nominal USD/RUB exchange rate as published by the Central Bank of Russia.

(b) Adjusted EBITDA represents profit/(loss) for the period excluding finance costs and finance income, income tax (benefit)/expense, depreciation and amortisation, foreign exchange (gain)/loss, impairment/ (reversal of impairment) of non-current assets, movements in allowances and provisions (except for provisions for bonuses), (gain)/loss on disposal of property, plant and equipment, (gain)/loss on changes in fair value of financial instruments, share of (profit)/loss of associates and other non-cash, non-recurring and unusual items

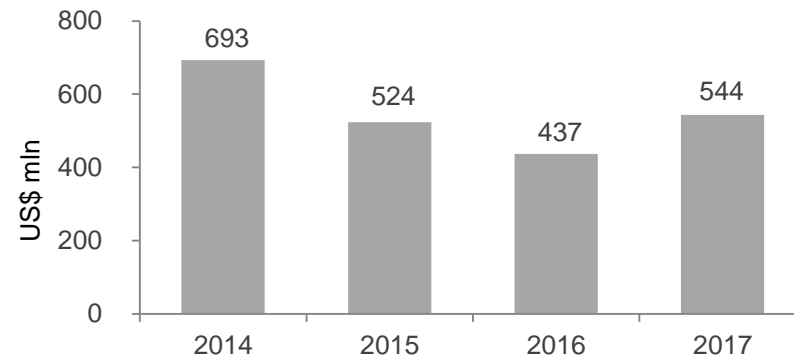

# Gross Margin, SG&A and Cash Conversion

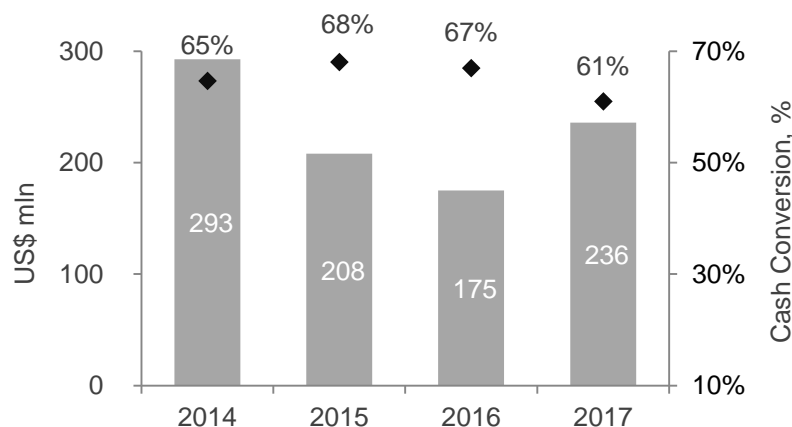

## Gross margin

## SG&A and corporate overheads<sup>(a)</sup>

## Capex and cash conversion<sup>(b)</sup>

## Key considerations

- Gross margin resilient through the cycle across both product lines
- Seamless segment accounting for more than 80% of consolidated gross profit and demonstrates consistently superior margins
- Major reduction in SG&A in response to the revenue decline in 2015-16
- Relatively high share of fixed costs in seamless segment provides strong leverage to volume growth
- Significantly optimized lean cost structure due to stringent efficiency measures

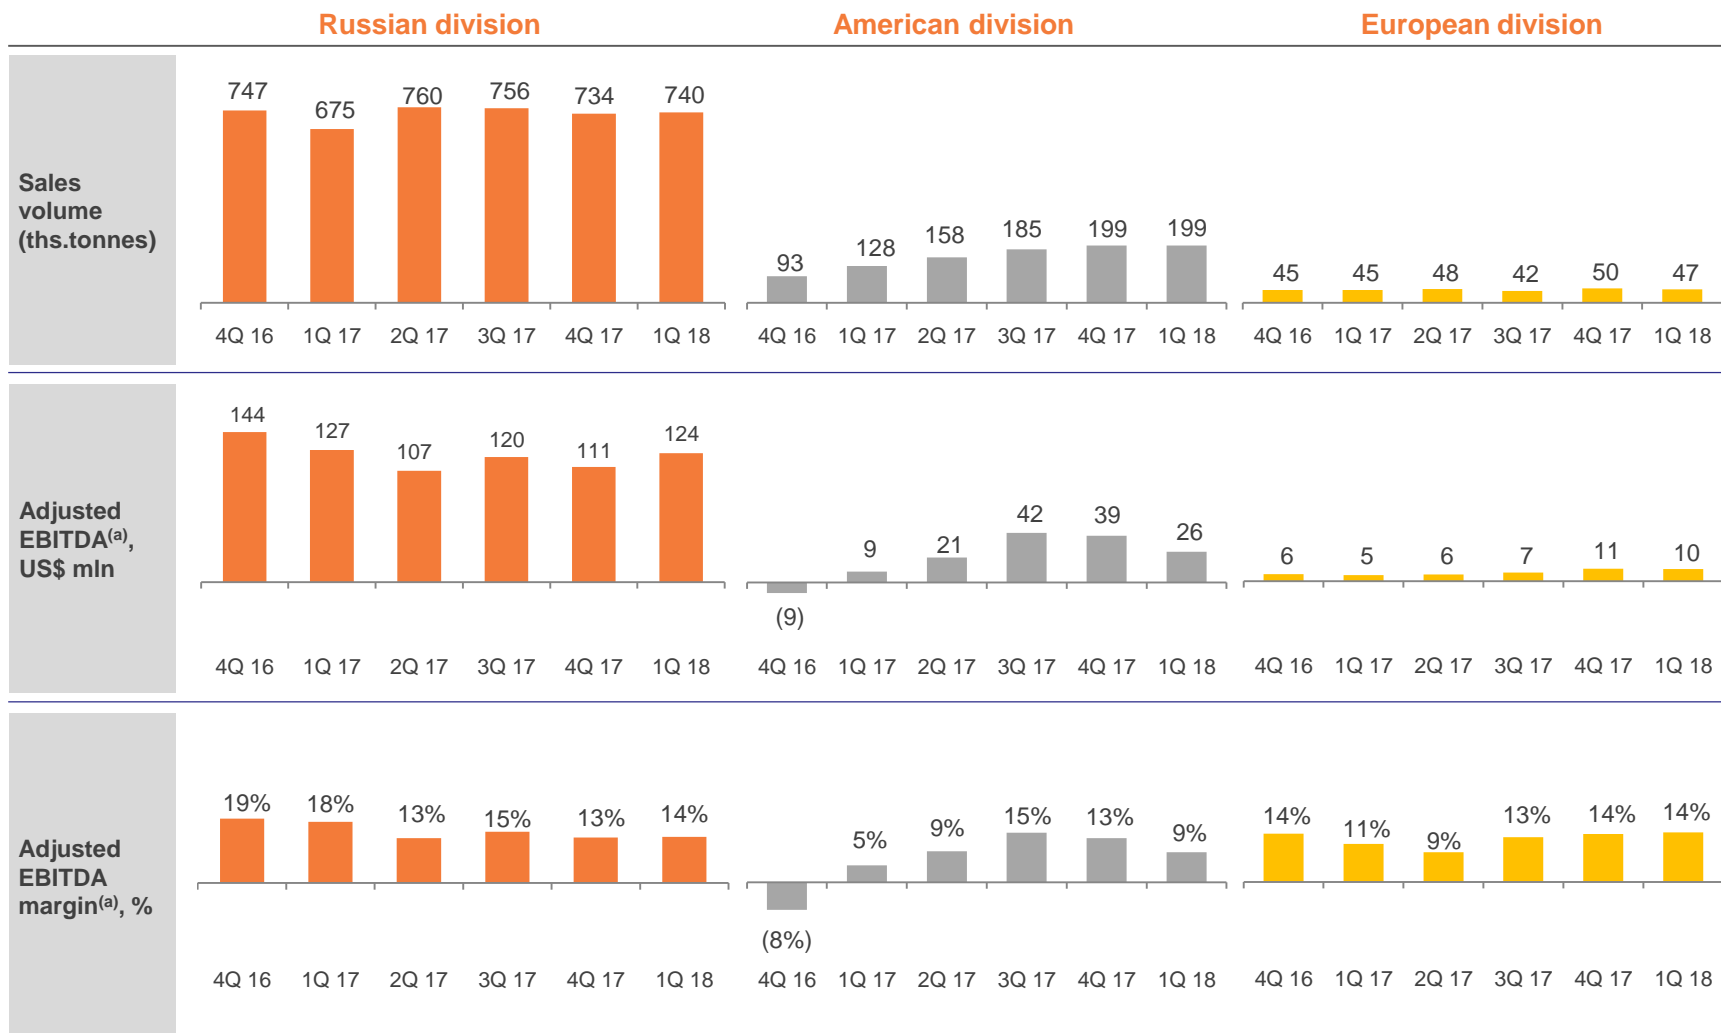

Source: TMK data

Note: (a) Based on IFRS financial statements. Calculated as Gross Profit less Operating profit

(b) Calculated as (Adjusted EBITDA – Capex) / Adjusted EBITDA. Adjusted EBITDA represents profit/(loss) for the period excluding finance costs and finance income, income tax (benefit)/expense, depreciation and amortisation, foreign exchange (gain)/loss, impairment/ (reversal of impairment) of non-current assets, movements in allowances and provisions (except for provisions for bonuses), (gain)/loss on disposal of property, plant and equipment, (gain)/loss on changes in fair value of financial instruments, share of profit/loss of associates and other non-cash, non-recurring and unusual items

# Segmental Quarterly Performance Dynamics

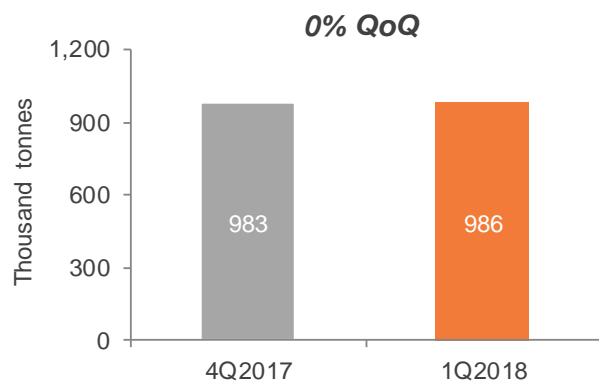

Source: TMK data

Note: (a) Adjusted EBITDA represents profit/(loss) for the period excluding finance costs and finance income, income tax (benefit)/expense, depreciation and amortisation, foreign exchange (gain)/loss, impairment/ (reversal of impairment) of non-current assets, movements in allowances and provisions (except for provisions for bonuses), (gain)/loss on disposal of property, plant and equipment, (gain)/loss on changes in fair value of financial instruments, share of (profit)/loss of associates and other non-cash, non-recurring and unusual item

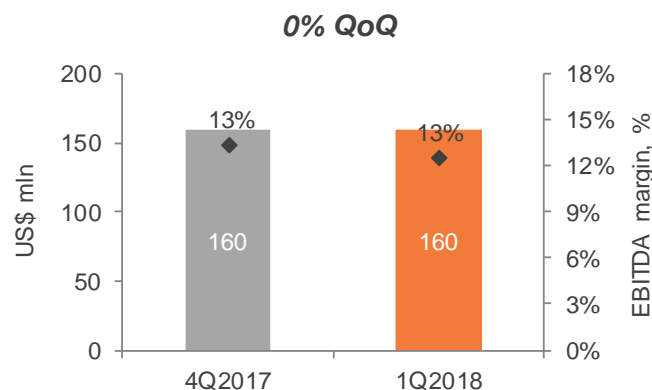

# 1Q 2018 vs. 4Q 2017 Summary Financial Highlights

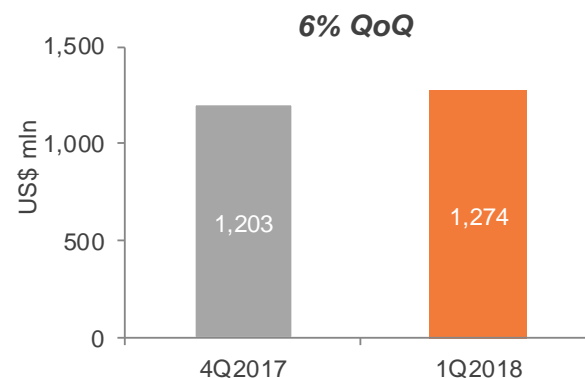

**Sales** were flat QoQ, with higher sales at the Russian division and stable volumes at the American division compensating for a slight decline at the European division

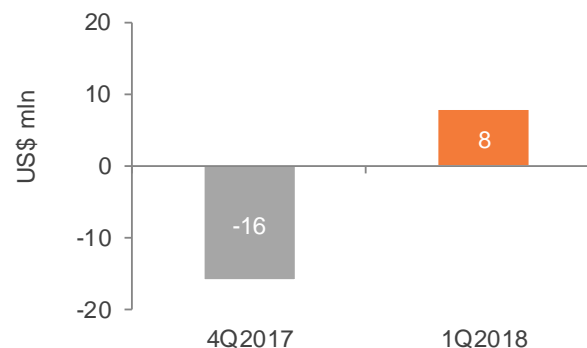

**Adjusted EBITDA** was flat QoQ, with the improved results of the Russian division being offset by a weaker performance of the American division, resulting partially from a hike in raw materials prices

**Revenue** increased QoQ, due to an improved performance at the Russian division, which was largely driven by a more favourable seamless pipe product mix and higher prices

**Net income** amounted to \$8 mln in 1Q 2018, compared to a net loss in the prior quarter, mainly due to higher operating profit

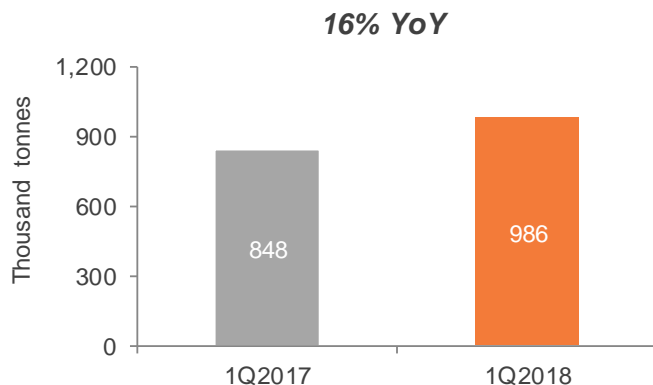

Source: TMK data

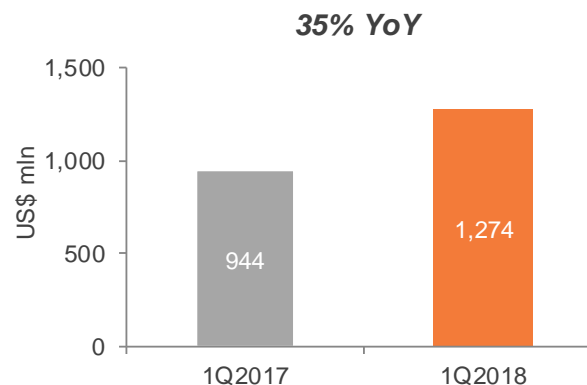

# 1Q 2018 vs. 1Q 2017 Summary Financial Highlights

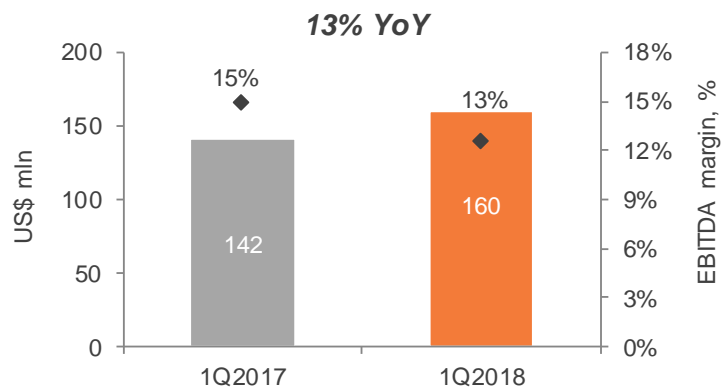

**Sales** were up YoY across all divisions

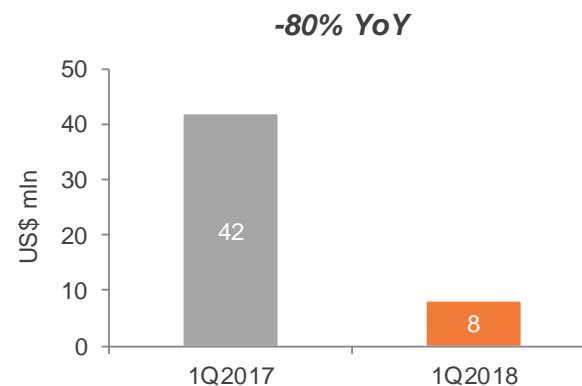

**Revenue** increased YoY, driven by stronger sales and improved pricing across all divisions

**Adjusted EBITDA** increased YoY, driven by a stronger performance at all three divisions, partially offset by higher YoY raw materials prices

**Net profit** decreased YoY, mainly reflecting a lower FX gain compared to 1Q 2017

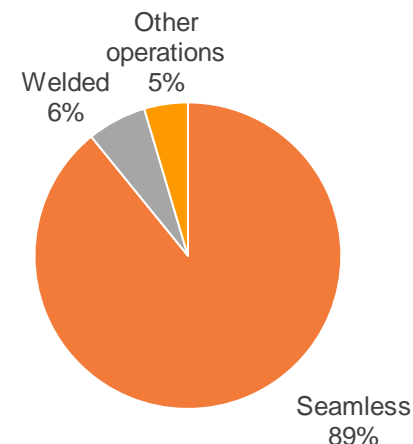

Source: TMK data

## Appendix – TMK Products

# Wide Range of Products

## Seamless

**OCTG**

Threaded pipes for the oil and gas industry including drill pipe, casing and tubing.

**Line Pipe**

The short-distance transportation of crude oil, oil products and natural gas.

**Industrial**

Automotive, machine building, and power generation sectors.

## Welded

**OCTG**

Threaded pipes for the oil and gas industry including drill pipe, casing and tubing.

**Line Pipe**

The short-distance transportation of crude oil, oil products and natural gas.

**Large-Diameter**

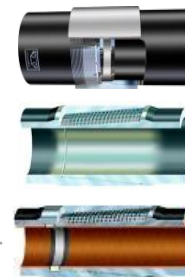

Construction of trunk pipeline systems for the long distance transportation of natural gas, crude oil and petroleum products.

**Industrial**

Wide array of applications and industries, including utilities and agriculture.

## Premium

**Premium Connections (TMK UP)**

Premium connections are proprietary value-added products used to connect OCTG pipes and are used in sour, deep well, off-shore, low temperature and other high-pressure applications.

## Oilfield Services

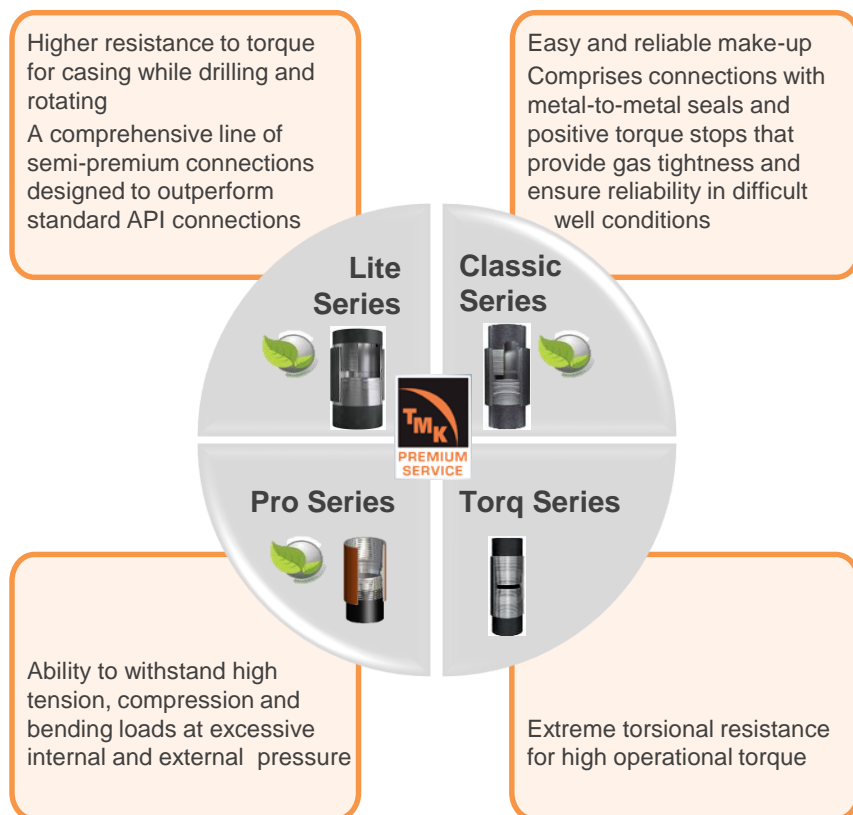

Well equipment precision manufacturing, tools' rental, supervising, inventory management, threading and coating services.

# TMK Premium Product Offering

## TMK connections series

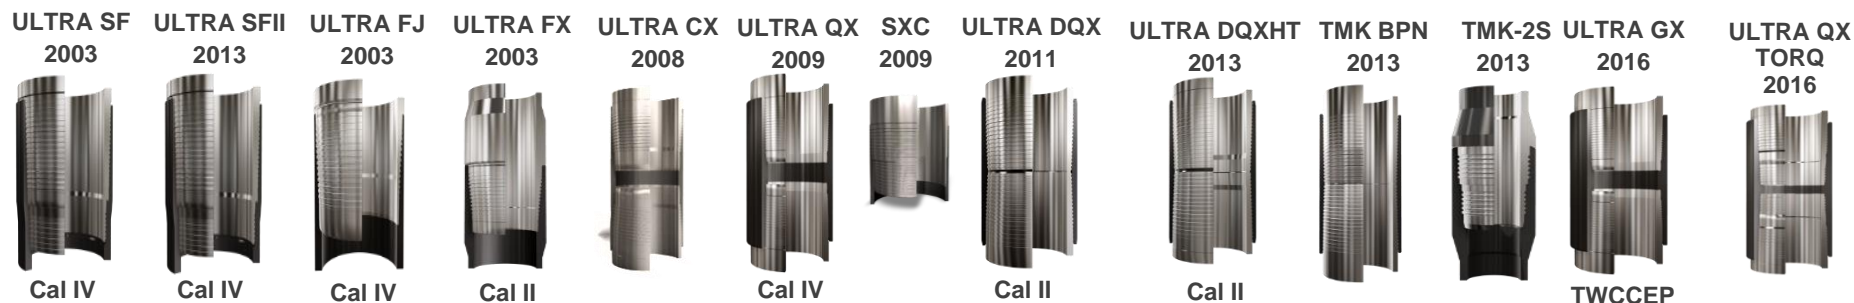

## Premium products and services

- TMK to maintain its share of premium connections market with greater focus on sales of 2<sup>nd</sup> and 3<sup>rd</sup> generation premium connections to improve sales efficiency and enhance competitive advantage
- TMK is actively developing HI-TECH products for unconventional reserves, including offshore deposits:
  - OCTG: with Premium threading, Cr13, GreenWell technology, alloy OCTG (L80, C90, T95, P110) mostly with Premium threading
  - Stainless steel pipe
  - Pipe with increased corrosion resistance
  - Vacuum insulated tubing
  - LDP

Pipes with premium connections are designed for O&G wells developed in challenging exploration and production conditions, including offshore, deep-sea and Far North locations, as well as for horizontal and directional wells

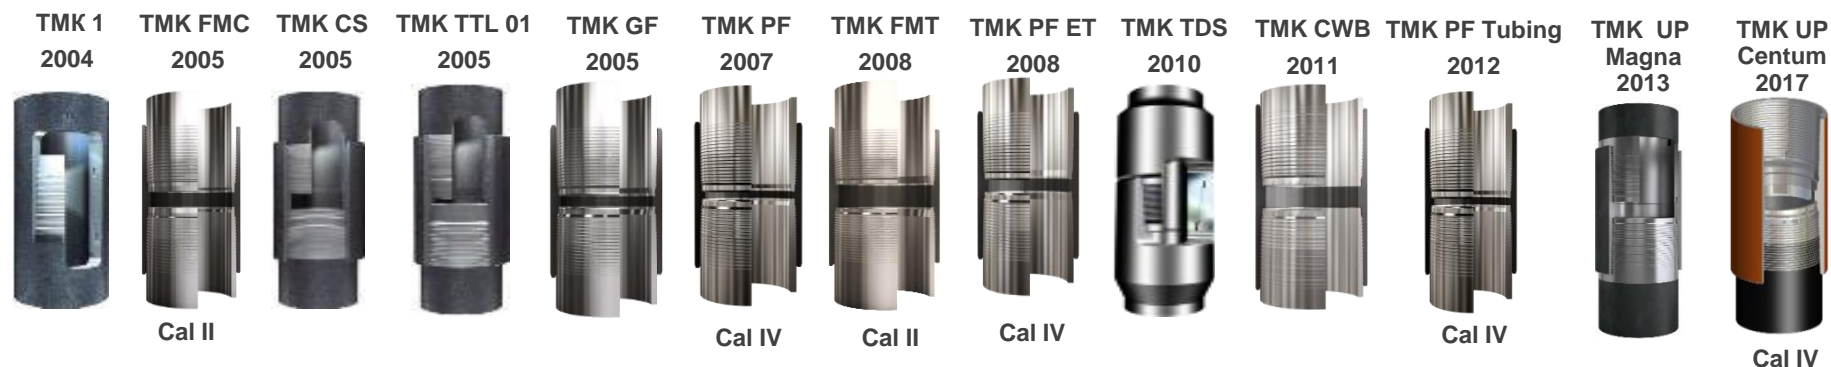

# Premium Solutions: TMK UP

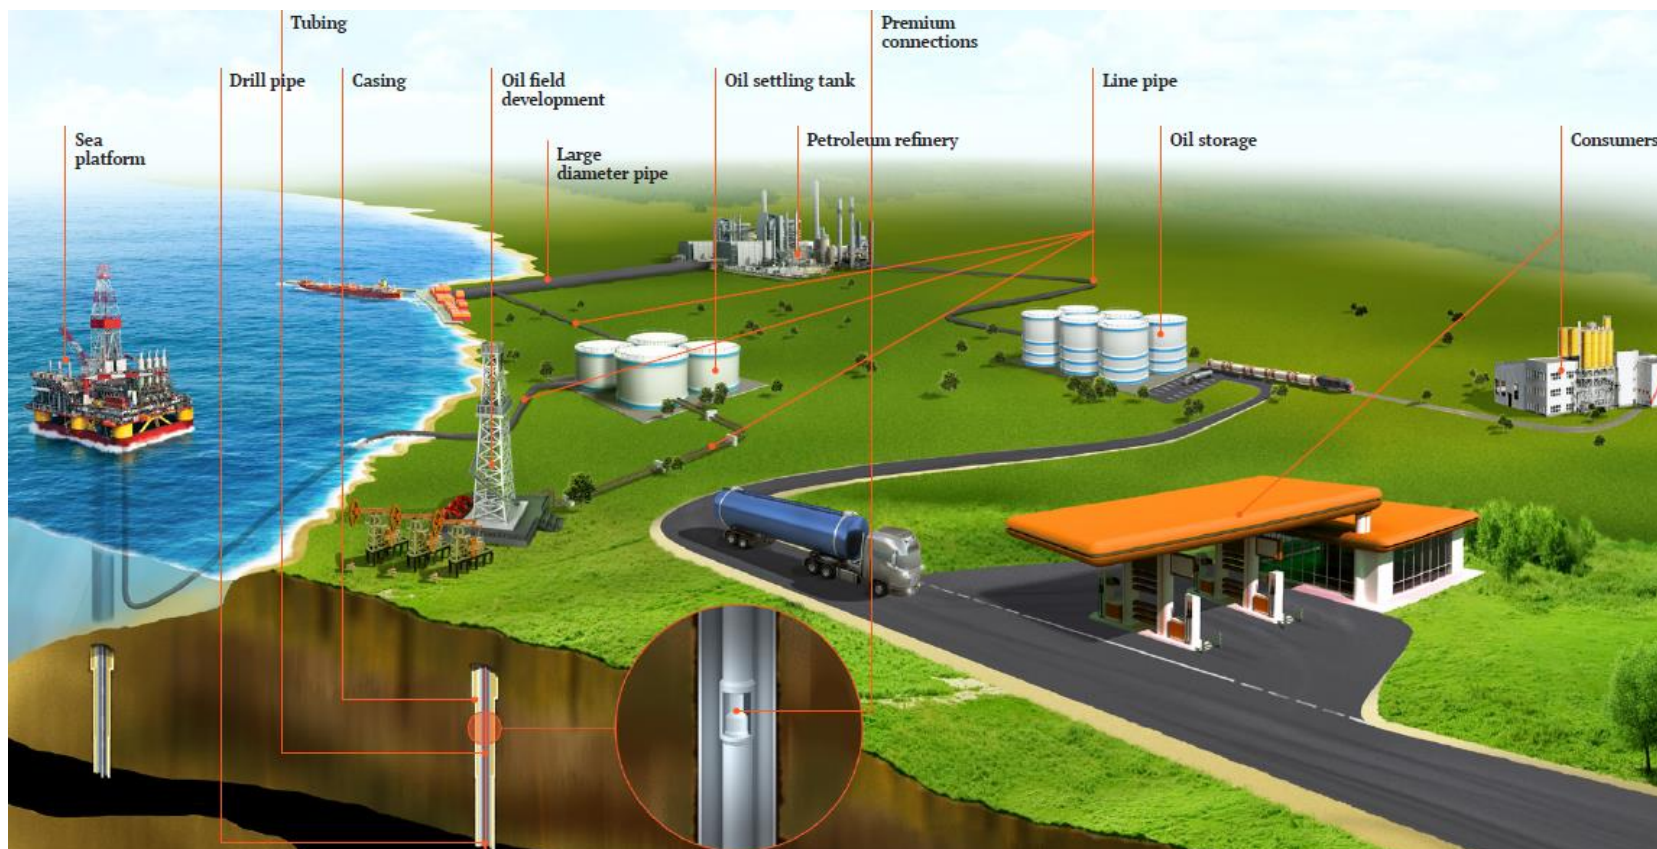

## Unique range of Premium products

- Onshore/offshore
- Sour gas
- Thermal
- Arctic
- Horizontal and extended reach
- Drilling with casing
- Steam-Assisted Gravity Drainage (SAGD)
- Connections are available with GreenWell environment friendly technology

# Utilisation of TMK Pipe Products in Oil and Gas Industry

- **OCTG** – Oil Country Tubular Goods (drilling, casing, tubing) used for oil & gas exploration, well fixing and oil & gas production (46% of total sales for 1Q 2018)
- **Line pipe** – used for short distance transportation of crude oil, oil products and natural gas (25% of total sales for 1Q 2018)
- **LDP** - large diameter pipe used for construction of trunk pipeline systems for long distance transportation of natural gas, crude oil and petroleum products (7% in total sales for 1Q 2018)

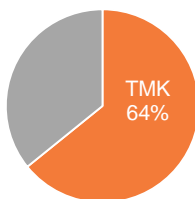

## Appendix – Other Materials

# TMK's Undisputed Market Leading Position in Russia

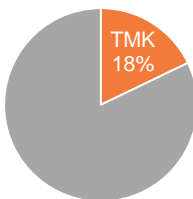

## Seamless

### OCTG

Threaded pipes for O&G industry including drill pipe, casing and tubing

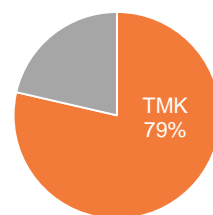

## Welded

### Line Pipe

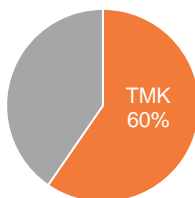

Short-distance transportation of O&G and oil products

## Premium

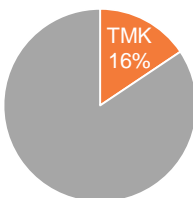

### Premium Connections (TMK UP)

Premium connections are proprietary value-added products used to connect OCTG pipes and are used in sour, deep well, off-shore, low temperature and other high-pressure applications

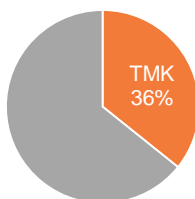

### Line Pipe

Short-distance transport of crude oil, oil products and natural gas

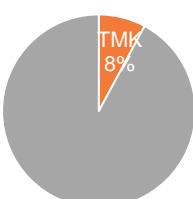

### Large Diameter

Construction of trunk pipeline systems for long distance transportation of O&G and petroleum products

### Industrial

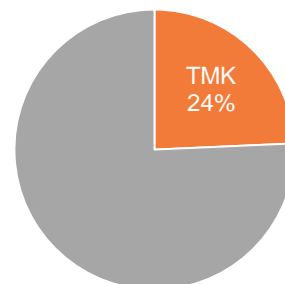

Automotive, machine building, and power generation sectors

### Industrial

Wide array of applications and industries, including utilities and agriculture

## #1 in the Russian Tube and Pipe Market

Source: TMK estimates, based on FY 2017 numbers

TMK will continue to grow its market share due to expected increased competitiveness of domestically produced pipes vs. imported ones (due to RUB depreciation)

### **TMK Investor Relations**
